

COMMERCE

2026

DEPARTMENT VISION AND MISSION

a. Vision Statement:

To be a centre of excellence in the realm of Commerce and Management, developing and nurturing global competencies in students through quality education, research and continuous innovation.

b. Mission Statement:

M1: To nurture commerce professionals who possess a high level of knowledge and competence to effectively contribute to society with commitment and integrity.

SYLLABUS FOR

COURSE NAME: FINANCIAL RISK ANALYTICS

COURSE CODE: COAF401-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)
(SEMESTER - VII)

Course learning Outcomes

CO1: Explain the fundamental concepts and types of financial risks and their relevance to financial institutions.

CO2: Apply Python-based data analysis techniques to measure and visualize different forms of financial risk.

CO3: Analyze market, credit, and operational risk exposure using quantitative risk metrics and simulations.

CO4: Evaluate alternative risk mitigation and stress-testing approaches using data-driven models.

CO5: Design Python-based financial risk analytics solutions and present project outcomes effectively.

Sustainability Development Goals (SDG)

Industry, innovation and infrastructure, Quality education

21st Century Skills

Analytical thinking, Technological literacy

Course Content

U1: Introduction to Financial Risk Analytics and Python Setup

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U1-T1. Overview of financial risks: market, credit, liquidity, and operational risks - Role of risk analytics in finance and regulation (Basel norms) - Python environment setup (Jupyter, libraries for finance) - Python basics refresher: data types, control structures, functions, and visualization - Importing and handling financial data from APIs and CSVs Project: Retrieve stock data using Yahoo Finance API and compute daily returns, return patterns & volatility.

U2: Market Risk Modeling using Python

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U2-T1. Measuring market risk: volatility, correlation, beta - Value-at-Risk (VaR): Historical

Simulation, Variance-Covariance, and Monte Carlo methods - Expected Shortfall (CVaR) estimation - Backtesting VaR models - Risk visualisation and interpretation Python Libraries: numpy, pandas, matplotlib, scipy.stats Project: Develop a Python model to estimate VaR and Expected Shortfall for a multi-asset portfolio.

U3: Credit Risk Analytics using Python

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U3-T1. Credit risk measurement: exposure, default probability, and loss given default - Credit scoring and logistic regression models - Credit portfolio models and Credit VaR - Machine Learning applications in credit risk (Decision Trees, Random Forest) - Model performance metrics (AUC, confusion matrix, classification report) Python Libraries: scikit-learn, statsmodels, seaborn Project: Build a credit scoring model using a real or open dataset (e.g., Kaggle's "German Credit Data").

U4: Operational and Liquidity Risk Analytics

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U4-T1. Sources and measurement of operational risk - Loss Distribution Approach (LDA) for operational risk - Liquidity risk modeling: cash flow gaps, liquidity ratios - Stress testing and scenario analysis using Python - Visualizing and communicating risk analytics – Simulation methods for operational loss estimation- liquidity stress testing. Python Libraries: numpy, matplotlib, seaborn, scipy Project: Simulate operational loss distribution and visualize tail risk under stress scenarios.

U5: Integrated Risk Modeling and Capstone Project

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U5-T1. Risk aggregation – Concept – relevance- combining market, credit, and operational risk - Portfolio-level risk analytics and capital allocation - Risk-adjusted performance measures (Sharpe ratio, RAROC, Treynor ratio) - Dashboards and visual storytelling using Python - Ethical and regulatory considerations in financial risk analytics Capstone Project suggestions: Develop an integrated risk analytics dashboard for a financial portfolio. Simulate credit defaults and estimate credit VaR for a bank'

Essential Reading

1. Jorion, P. (2007). Value at risk: The new benchmark for managing financial risk (3rd ed.). McGraw-Hill.
1. Dowd, K. (2005). Measuring market risk (2nd ed.). Wiley.
1. Crouhy, M., Galai, D., & Mark, R. (2014). The essentials of risk management (2nd ed.). McGraw-Hill.
1. Hilpisch, Y. (2018). Python for finance: Mastering data-driven finance (2nd ed.). O'Reilly Media.
1. Hilpisch, Y. (2020). Financial theory with Python. O'Reilly Media.
1. Roncalli, T. (2020). Handbook of financial risk management: Simulations and case studies. Chapman & Hall/CRC.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL RISK ANALYTICS

COURSE CODE: COAF401-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: FINANCIAL SENTIMENT ANALYTICS

COURSE CODE: COAF401-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)
(SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the role of textual data and sentiment in financial markets.

CO2: Apply Python-based NLP techniques to extract and preprocess financial text data.

CO3: Analyze sentiment trends from news articles, reports, and social media data.

CO4: Evaluate sentiment models for accuracy and predictive power in financial contexts.

CO5: Design a sentiment-driven financial analytics project for investment or risk decisions.

Sustainability Development Goals (SDG)

Climate action, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Quality education

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Financial Sentiment and Text Analytics

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Human Values

U1-T1. Introduction to Financial Sentiment and Text Analytics

Description

Overview of financial sentiment analysis and its importance in finance - Market psychology and behavioural finance overview - Data sources: news headlines, earnings reports, analyst commentary, social media (Twitter, Reddit) - Introduction to text data, structure, and representation (tokens, words, corpora) - Applications in asset pricing, risk assessment, and portfolio management

U2: Text Mining and NLP Fundamentals using Python

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U2-T1. Text Mining and NLP Fundamentals using Python

Description

Text preprocessing: tokenization, stemming, lemmatization, stopword removal - Word frequency analysis and visualization (word clouds, n-grams) - Text representation models: Bag-of-Words, TF-IDF, Word2Vec, BERT embeddings - Introduction to Python NLP libraries: nltk, spaCy, textblob, transformers - Practical exercises with financial datasets.

Project: Cleaning and preparing stock news headlines dataset for analysis

U3: Financial Sentiment Scoring and Analysis

Teaching Hours: (12)

Development Needs:

Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U3-T1. Financial Sentiment Scoring and Analysis

Description

Lexicon-based approaches: Loughran–McDonald, VADER, and Harvard IV dictionaries - Calculating sentiment polarity and subjectivity - Topic modeling: LDA and NMF - Measuring sentiment impact on asset prices - Sentiment indices and correlation with market returns – sentiment and financial performance of stocks – sentiment trends in world market events.

Project : Constructing a sentiment index using Loughran–McDonald dictionary for company news

U4: Machine Learning for Sentiment Prediction

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Machine Learning for Sentiment Prediction

Description

Supervised and unsupervised learning for text data - Feature extraction for sentiment classification - Algorithms: Logistic Regression, Random Forests, Naive Bayes, SVM - Deep learning with RNNs and Transformers (BERT, FinBERT overview) - Model training, testing, and evaluation (precision, recall, F1, ROC-AUC)

Project: Build a sentiment classification model using FinBERT on financial news headlines

U5: Applications and Project Development in Financial Sentiment Analytics

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U5-T1. Applications and Project Development in Financial Sentiment Analytics

Description

Integrating sentiment analysis in trading strategies and portfolio management - Event studies using sentiment data (earnings announcements, policy changes, crises) - Sentiment-driven volatility forecasting and risk modeling - Capstone Project: End-to-end Financial Sentiment Analytics Model - Presentation and interpretation of project outcomes Capstone Project Suggestions:

- Building a Twitter-based stock sentiment prediction model
- Predicting stock price movements using FinBERT sentiment scores
- Analyzing sentiment-driven volatility during financial crises

EXAMINATION PATTERN

COURSE NAME: FINANCIAL SENTIMENT ANALYTICS

COURSE CODE: COAF401-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. COURSE NAME: INTERNATIONAL BUSINESS

COURSE CODE: COAF402-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)

(SEMESTER - VII)

Course learning Outcomes

CO1: Explain the fundamental concepts, theories, terminology, and evolving environment of international business.

CO2: Discuss and interpret the impact of globalization on international business with reference to economic, political, socio-cultural, and technological factors.

CO3: Apply international marketing intelligence, trade practices, and export–import procedures to solve problems in global business contexts.

CO4: Analyze the effects of government policies, trade regulations, and regional economic integrations on international business operations and decision-making.

CO5: Evaluate alternative market entry strategies and the role of Foreign Direct Investment (FDI) in international expansion to recommend suitable approaches for business growth.

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Foundations of International Business

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Entrepreneurship, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Evolution, nature, and significance of international business. Stages of internationalization and the EPRG framework. Trade theories: Mercantilism, Absolute Advantage, Comparative Advantage, Factor Endowment, and Competitive Advantage. Overview of political, economic, social-cultural, and technological environments. Barriers to trade and their economic and political motives. Protection of domestic industries and preservation of national identity. Tools such as tariffs, quotas, subsidies, and export financing.

Description

U2: Globalization and Trade Environment

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

None

U2-T1. Meaning, features, and implications of globalization. Globalization's socio-cultural, political, legal, and economic impact. Global trade organizations: GATT, WTO, and the role of UNCTAD. Current trends: Sustainability, digitalization, and global supply chains.

U3: Market Entry Strategies and FD

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U3-T1. Modes of entry: Exporting, licensing, franchising, contract manufacturing, joint ventures, and turnkey projects. Strategic alliances and mergers & acquisitions. FDI: Drivers, challenges, and its role in economic development. Comparison of entry modes with case studies.

U4: Regional Integration and Multinational Corporations

Teaching Hours: (10)

Development Needs:

Global, National, Regional

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U4-T1. Types of regional integration: Free trade area, customs union, common market, and economic union. Key trade blocs: EU, ASEAN, NAFTA, SAARC, and MERCOSUR. Role and influence of MNCs on global trade and economies. Ethical dilemmas and CSR practices in international business

U5: International Marketing Intelligence and Business Practices

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U5-T1. Key elements of international marketing. International marketing research and information systems. Emerging trends: E-commerce, digital marketing, and consumer behavior analysis. Strategies for cultural adaptation and global branding. Export-import practices: Trade financing, EXIM Bank, ECGC, and methods of payment. Key trade terms: FOB, CIF, FAS, EXW, and others. Export and import procedures and documentation.

U6: Business-Government Relations in International Trade

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Entrepreneurship
Cross Cutting Issues:
Professional Ethics

U6-T1. Analysis of government policies impacting international trade. Tools like foreign trade zones, administrative delays, and currency controls. Special government agencies promoting trade. Barriers to trade, motives, and protectionist policies to safeguard domestic industries. Preservation of national identity and responses to unfair trade practices
Essential Reading

2. Cateora, Philip R., Graham, John L., and Gilly, Mary C., International Marketing, 19th Edition, McGraw Hill, 2022.

2. Keegan, Warren J., Global Marketing Management, 9th Edition, Pearson, 2021. 17th Edition, Pearson, 2022.////

EXAMINATION PATTERN

COURSE NAME: INTERNATIONAL BUSINESS

COURSE CODE: COAF402-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Section A- Short Answer Questions (Answer ALL three questions, out of which the third question has internal choice). Each question carries 5 marks. $3 \times 5 = 15$

Section B- Conceptual/Descriptive/Problem Type Questions(Answer ALL two questions, out of which one question has internal choice). Each question carries 10 marks, $2 \times 10 = 20$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A- Short Answer Questions–Answer ALL seven questions, out of which Questions 6 and 7 have internal choice. Each question carries 5 marks. $7 \times 5 = 35$ Marks

Section B- Conceptual / Descriptive / Problem Type Questions –Answer ALL five questions, out of which two questions have internal choice. Each question carries 10 marks. $5 \times 10 = 50$

Section C- Case Study (Compulsory). $1 \times 15 = 15$

COURSE NAME: FIXED INCOME SECURITIES & TREASURY MANAGEMENT

COURSE CODE: COAF403A-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)

(SEMESTER - VII)

Course learning Outcomes

CO1: Understand fixed-income securities and their markets, yield measures, risk factors, and valuation measures and drivers.

CO2: Estimate the risks and expected returns for fixed income instruments

CO3: Analyse the term structure of interest rates and yield spreads.

CO4: Understanding the treasury function and raising different forms of capital.

CO5: Appraise Equity Structured Products Capital-Guaranteed and High-Yield Products

Sustainability Development Goals (SDG)

Decent work and economic growth

21st Century Skills

Analytical thinking

Course Content

U1: Analysis of Fixed Income Securities

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Analysis of Fixed Income Securities Bond Valuation & Interest rate Models; Yield Curve and Term Structure Analysis Determinants of bond yields; Fixed income derivatives: T-bill, t-note, t-bond derivatives, Euro-bond and municipal bond derivatives, Pricing fixed income derivatives: cost of Carry model – under perfect & imperfect market conditions

U2: Bond Risk analysis, management & bond portfolio strategies

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U2-T1. Measuring & managing Interest rate risk, currency risk & credit risk; Micro hedging & Macro Hedging; Concept of yield curve risk – passive & active portfolio strategies

U3: Fixed Income Structured Products

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U3-T1. Introduction to structured finance products; Concept of Securitization; Fixed income structured finance products; Mortgage backed and asset backed securities; collateralized bond obligations (CBO); Application of structured products in various financial areas

U4: Equity Structured Products

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U4-T1. Principle protected note; Equity trading strategies involving options: Call & Put spreads, Straddle, Calendar spreads. Equity Exotics: Asian options, Barrier options. Other Structured Derivatives: Complex structured derivatives based on multi-asset payoff (Hybrid Products based on instruments from different asset classes); Effect of correlation between various asset classes on product price. Credit derivatives Default Probabilities; Credit derivatives; Credit Default swap (CDS); Credit Linked note (CLN); Modeling default correlations; First to default baskets; Convertible bonds.

U5: Treasury Management

Teaching Hours: (6)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Concept, Functions, Meaning, Structure, overview of risk management, Treasury organisation and structure, A treasury control framework, Treasury performance management, Complying with Sarbanes-Oxley, Corporate credit ratings

U6: The role of the Treasury and Treasurer

Teaching Hours: (6)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U6-T1. Cash Management, Objectives, Cash Flow forecasting, working capital management, excess liquidity, short term investing, using long term instruments, rolling down the curve, short term borrowing etc

U7: Raising Capital

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U7-T1. Loan Finance, Debt securities, Bond risk management, equity funding, alternative sources of financing, Asset Finance, Project Finance, Leasing, Hire Purchase etc.

U8: Risk Management

Teaching Hours: (8)

Development Needs:

Global, National

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U8-T1. Foreign currency risk management, other risks involved in treasury operations, corporate treasury, bank treasury, managing financial risk, Enterprise risk management, Accounting for treasury. Issues relating to LIBOR transition and its impact.

Essential Reading

Hull, John C., Options, Futures and Other Derivatives, Prentice Hall, Latest Edition

Suresh M. Sundaresan, Fixed Income Markets and Their Derivatives, International Thomson Publishing, Latest Edition

Frank A. Fabozzi, The Handbook of Mortgage Backed Securities, Probus Publishers, Latest Edition

F. J. Fabozzi, The Handbook of Fixed Income Securities, Tata McGraw, Latest Edition

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Section A- Short Answer Questions (Answer ALL three questions, out of which the third question has internal choice). Each question carries 5 marks. $3 \times 5 = 15$

Section B- Conceptual/Descriptive/Problem Type Questions (Answer ALL two questions, out of which one question has internal choice). Each question carries 10 marks, $2 \times 10 = 20$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - Short Answer Questions (Answer ALL seven questions, out of which Questions 6 and 7 have internal choice). Each question carries 5 marks. $7 \times 5 = 35$

Section B - Conceptual / Descriptive / Problem Type Questions (Answer ALL five questions, out of which two questions have internal choice). Each question carries 10 marks. $5 \times 10 = 50$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

COURSE NAME: MERGER & ACQUISITION

COURSE CODE: COAF403B-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)

(SEMESTER - VII)

Course learning Outcomes

CO1: Understand the Concepts and importance of Mergers, Acquisitions, and Corporate restructuring to the business world.

CO2: Evaluate the effectiveness of pre- and post-merger performances

CO3: Evaluate the value of a company for a merger, acquisition, and Corporate restructuring deal

CO4: Evaluate the effectiveness of different legal and Cultural aspects in Mergers, Acquisitions, and Corporate restructuring transactions.

CO5: Evaluate the takeover defenses to protect the company and fulfill shareholder duties.

Sustainability Development Goals (SDG)

Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Introduction to Mergers and Acquisitions

Teaching Hours: (13)

Development Needs:

National

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Introduction. History of Merger Movements. Forms of Corporate Restructuring: Expansions, Mergers and Acquisitions, Tender Offers, Joint Ventures, Sell Offs, Spinoffs, Split offs, Split ups, Divestitures, Employees Stock Option Plans (ESOPs), Equity Carve Outs, Master Limited Partnership (MLP). Corporate Control Premium, Buybacks, Standstill Agreements, Leveraged Buyouts. Merger Process: Five-stage model. Economic rationale for M&A. Description

U1-T2. Major types of Mergers- Horizontal mergers - Vertical mergers - Conglomerate mergers - Concentric Mergers. Framework for analysis of mergers. Organization learning and organization capital. The Role of industry life cycle, Product life cycle in M&A. Role of AI in M&A decision making

U2: Cost and Benefit of Merger

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Cost and benefit analysis of merger (mergers as a capital budgeting decision) - Share exchange ratio - Problems of calculating pre- and post-merger performances.

U3: Valuation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Multiples – various kinds of multiples and how to view this from the perspective of M&A. What are the factors that impact the multiple, and how to find the right multiple to value the company? Risk-free rate of return – Key things to remember while doing cross-border M&A. Beta- What factors impact beta. Levered and unlevered beta. Valuation during special situations of M&A- growth companies, distress companies, stable growth companies, listed and unlisted companies, volume and liquidity discount

U3-T2. Companies with negative cash flows, cash risk companies, IRR expectations, and control premium. Valuation for cash Vs stock deals. Common mistakes/biases at the time of valuation. Negotiation for valuation in M&A deals – convert structure, warrant structure, and other ways of structuring options. Special situation in valuation – SEBI valuation rules, takeover code valuation rules, FDI valuation rules. AI-assisted multiple selection and peer comparison - AI in forecasting cash flows and IRR

Description

U4: Legal and Cultural Aspects in Merger

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Organizational and human aspects – managerial challenges of M & A - Legal and regulatory framework of M & A – provisions of Companies Act - Indian Income Tax Act - SEBI takeover code

U5: Take Over Defenses

Teaching Hours: (8)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Takeover defences – financial defensive measures – Coercive offers and defence – anti-takeover amendments – poison pill defence. Case examples: AI use in modern corporate

defence Description

EXAMINATION PATTERN

Section B - Conceptual / Descriptive / Problem Type Questions (Answer ALL five questions, out of which two questions have internal choice).Each question carries 10 marks. $5 \times 10 = 50$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

COURSE NAME: INTERNATIONAL FINANCIAL MANAGEMENT

COURSE CODE: COAF404-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research)
(SEMESTER - VII)

Course learning Outcomes

CO1: Understand the basic concepts of Multinational firms, environment of international financial management and foreign exchange market;

CO2: Understand financial viability of capital expenditure plans and risk in financial decision making;

CO3: Analyse issues related to various finance functions of MNCs;

CO4: Evaluate translation, transaction, and economic exposure to exchange rate changes;

CO5: Create and appraise foreign exchange portfolio

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Introduction:

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U1-T1. Globalization and the multinational enterprise (MNE); Environment of International Financial Management; Complexities and issues in financial decision making of MNEs; Decisions in a global setting; Foreign Exchange Market- Spot and Forward market; Participants in foreign exchange market; Arbitrage, hedging and speculation; Covered interest rate arbitrage; Contemporary issues in international financial management.

U2: Cross-Border Investment Decision:

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U2-T1. Types of and issues in cross border investment decision; Green field investment vs. cross border M&As; Estimation of cash flows from cross border investment projects; Valuation techniques including adjusted present value method; Risks in cross border investment decision-currency risk, political risk, country risk, inflation risk etc; Techniques for incorporating risks in cross border investment decision

U3: Working Capital Management in MNEs:

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U3-T1. International Cash management, International Inventory management and International receivables management; International capital structure and cost of capital; Determinants of capital structure of MNEs; Dividend decision and policies of MNEs; International transfer pricing.

U4: Managing currency Risk and Interest Rate Risk:

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U4-T1. Types of risk exposure - Transaction exposure, Economic exposure, and Translation exposure; Measurement of risk exposure; Management of currency risk using currency forwards and futures, currency options and currency swaps; Assessment of interest rate risk; Management of interest rate risk using Interest rate futures, interest rate swaps and other financial swaps.

U5: International Diversification and Portfolio Investment:

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U5-T1. Global markets for equities; Risk factors in international investing; International diversification-risk and return aspects; International CAPM assuming no differences in consumption and no barriers to investment as well as assuming such differences; Identification of optimum portfolio; International Capital Market. Foreign Portfolio. GDR, ADR, Cross, listing of shares Global registered shares. International Financial Instruments: Foreign Bonds Eurobonds, Global Bonds. Floating rate Notes, Zero coupon Bonds, International Money Markets International Banking services; Correspondent Bank, Representative offices, Foreign Branches. Forward Rate Agreements.
Essential Reading

Bekaert, G., & Hodrick, R. (2017). *International Financial Management* (3rd ed.). Cambridge: Cambridge University Press. doi:10.1017/9781316282274
The Financial Times or Wall Street Journal.

IMF Staff Papers,

EXAMINATION PATTERN

COURSE NAME: INTERNATIONAL FINANCIAL MANAGEMENT

COURSE CODE: COAF404-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Section A- Short Answer Questions (Answer ALL three questions, out of which the third question has internal choice). Each question carries 5 marks. $3 \times 5 = 15$

Section B- Conceptual/Descriptive/Problem Type Questions(Answer ALL two questions, out of which one question has internal choice). Each question carries 10 marks, $2 \times 10 = 20$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - Short Answer Questions (Answer ALL seven questions ,out of which Questions 6 and 7 have internal choice). Each question carries 5 marks. $7 \times 5 = 35$

Section B - Conceptual / Descriptive / Problem Type Questions (Answer ALL five questions, out of which two questions have internal choice).Each question carries 10 marks. $5 \times 10 = 50$

Section C - Case Study (Compulsory). $1 \times 15 = 15$

COURSE NAME: CLIMATONOMICS

COURSE CODE: COM401-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the interlinkages between climate systems, economic growth, and sustainability frameworks.

CO2: Analyze the economic impacts of climate change and evaluate the effectiveness of policy tools such as carbon pricing, green taxes, and emissions trading.

CO3: Design innovative and sustainable financial or policy models that promote low-carbon transitions and circular economies.

CO4: Apply climatonic principles to assess sectoral risks and develop adaptive strategies for businesses, communities, and governments.

CO5: Demonstrate leadership and ethical responsibility in formulating evidence-based, climate-resilient economic decisions

Sustainability Development Goals (SDG)

Affordable and clean energy, Climate action, Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Climatedonomics

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Foundations of Climatedonomics Introduction to Climatedonomics: Definition, scope, and significance, Climate science fundamentals and the economics of environmental degradation, Climate externalities and market interdependencies, Sustainable development frameworks: UN Sustainable Development Goals (SDGs), Triple Bottom Line, and Planetary Boundaries, Concept of green economy and low-carbon development pathways

Description

U2: Economic Impacts and Policy Instruments of Climate Change

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Economic Impacts and Policy Instruments of Climate Change Relationship between GDP growth, resource consumption, and emissions, Economic impacts of climate change: adaptation vs. mitigation costs, Policy instruments for climate management – carbon pricing, emissions trading, green taxes, and subsidies, Climate policy frameworks: Kyoto Protocol, Paris Agreement, and COP outcomes, Case studies: EU Emissions Trading System (EU ETS) and India's Perform–Achieve–Trade (PAT) Scheme

Description

U3: Green and Sustainable Finance Mechanisms

Teaching Hours: (15)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Green and Sustainable Finance Mechanisms Green bonds, ESG investing, and sustainable finance principles; role of development banks and institutional investors in climate finance; risk assessment, disclosure, and sustainability reporting frameworks (TCFD, GRI); financing circular economy and renewable energy transitions; designing green business and investment models. Add Practical Elements: ·Case Study (India): Examine India's Sovereign Green Bond (2023 issue) — structure, pricing, investor r

Description

U4: Climate Risk Management and Adaptive Strategies

Teaching Hours: (15)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Climate Risk Management and Adaptive Strategies Sectoral risk analysis: agriculture, energy, transport, and finance, Climate resilience, disaster risk reduction, and insurance mechanisms, Public–private partnerships for adaptation and resilience building, Technological innovations for mitigation (AI, IoT, green tech), Case studies on successful adaptation models (India and global). Add Practical Elements: ·Risk Mapping Exercise: Students create a simple climate risk profile for an Indian sect

Description

U5: Ethics, Leadership, and Climate Governance

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Ethics, Leadership, and Climate Governance Ethical dimensions of climate economics and intergenerational equity, Global governance for climate action: UNEP, IPCC, IMF, World Bank, Corporate responsibility and climate disclosure practices, Leadership in sustainability: case studies of climate champions and policy innovators, Practical exercises in sustainable decision-making and climate ethics.

Description

Essential Reading

1.Green and Sustainable Finance: Principles and Practice (3rd Ed., 2025) by Simon Thompson provides a comprehensive guide to how finance, regulation, and innovation drive-global-climate-and-sustainability-transitions.

Principles of Sustainable Finance (2nd Ed.,2023) by Dirk Schoenmaker and Willem Schramade explains how financialsystems and economic decisions can align with environmental and socialsustainability within planetary boundaries

EXAMINATION PATTERN

COURSE NAME: CLIMATONOMICS

COURSE CODE: COM401-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I (20 marks), CIA II (50 marks), CIA III (20 marks)

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions, out of which six and seven have internal choice). Each question carries five marks | $7 \times 5 = 35$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions, out of which two questions are internal choice). Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: FINANCIAL MODELING

COURSE CODE: COM401F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Apply the concept of financial modelling with respect to business decisions and framing strategies.

CO2: Analyse financial statements to derive insights about business performance.

CO3: Develop forecasts based on realistic assumptions and market conditions.

CO4: Apply strategic analysis tools alongside financial modelling techniques to inform business decisions.

CO5: Construct robust financial models using advanced Excel techniques.

Sustainability Development Goals (SDG)

Decent work and economic growth, Gender equality, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Financial Architecture

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Reviewing the significance, core blocks, and operational goals of structured models in corporate governance. Establishing professional formatting frameworks: FAST design guidelines, color-coding models (input sheets, calculation blocks, output displays), and row indexing structures. High-speed manual layout execution tools: keyboard shortcut navigation paths, freezing layout panels, row sorting filters, and data validations. Advanced formula modeling: deploying multi-level logic statements (IF, AND, OR), data tracking parameters (VLOOKUP, INDEX-MATCH), and time-value metrics (CAGR, simple IRR). Integrating conversational AI modeling assistants as formula coaches to write clean logic strings and identify broken references. Designing error-isolation panels, balancing diagnostic view grids, and net cash reconciliation checks to ensure absolute model stability without hardcoded data plugs.

Description

Project: Historical Three-Statement Corporate Core Builder. Students select a listed public company and download its raw financial filings for the past 3 years. Using AI prompting students to clean, format, and

structure the unorganized figures into an international-standard spreadsheet database template, completely backed by automated error check validation panels to prove the sheets balance dynamically.

U2: Visual Dashboarding

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Shifting out of flat tabular charts into dynamic cross-platform data visualizations using Microsoft Power BI Desktop. Ingesting disjointed transactional data sources safely. Data engineering inside the Power Query Editor environment: previewing data column qualities, formatting data types, removing blank cells, splitting text strings, and deleting nested duplicate transaction errors without manual typing. Formulating advanced operational accounting metrics using Data Analysis Expressions (DAX): creating calculated columns, rolling averages, Year-over-Year (YoY) revenue variances, and margin growth percentage counters. Structuring high-impact canvas containers: cash flow waterfall blocks, line trend distributions, correlation scatter charts, and primary corporate KPI display cards. Configuring interactive parameter switchboards and visual slicers to build user-friendly report layouts.

Description

Project: Corporate Interactive Performance Intelligence Board. Working with a multi-file database of raw monthly retail operations and warehouse distribution records, students use Power Query to clean and link the disjointed tables. They write basic DAX financial metrics to build a multi-page interactive executive dashboard evaluating branch efficiency and monthly revenue growth against company margins.

U3: Financial Statement Analysis & Modelling

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Structural rules of connected corporate data modeling. Building seamless calculations that link the core three financial statements together: Income Statement, Balance Sheet, and Statement of Cash Flows. Accounting logic translation: tracking changes in working capital accounts, modeling asset depreciation schedules, and structuring equity/debt balances. Utilizing conversational AI data tools to draft forecasting assumptions, define key growth drivers, and map long-term operational lines. Establishing dynamic statement links. Integrating text summarizers to generate quick margin-safety reports on historical data records. Financial statement scenario analysis and sensitivity analysis.

Description

Project: Integrated Multi-Year Corporate Projection Model. Students take their clean historical corporate spreadsheet from Unit 1 and construct a fully linked multi-year forecasting extension. Utilizing AI assistance to trace metric behaviors, they build a model where changing an operational driver cell (such as inventory turnover or sales growth) causes all three statements to recalculate across the forecast horizon while remaining perfectly balanced.

U4: Corporate Finance & Valuation Modelling

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Time value of money concepts. Leverage measures and cost of capital. The long-term financing decisions. Discounted Cash Flow (DCF) valuation. Engineering analytical systems to evaluate long-term corporate investments, project cash allocations, and funding targets. Formulating multi-stage project cash flows. Advanced project evaluation metrics modeling: Net Present Value (NPV), Internal Rate of Return (IRR), and discounted payback durations. Leveraging AI data interpreters to analyze raw industry sector benchmarks and calculate the dynamic Weighted Average Cost of Capital (WACC). Engineering multi-variable base, best, and worst-case scenario matrices. Using built-in Excel tools (Data Tables, Scenario Manager) alongside conversational AI scripting prompts to design automated model controllers using CHOOSE and OFFSET arrays.

Description

Project: Capital Allocation Strategy & Cost Sensitivity Matrix. Students build a capital project model evaluating an enterprise franchise expansion plan. Deployed entirely without coding, students integrate dynamic scenario switchboards and multi-variable Data Tables that allow company executives to instantly view the project's adjusted NPV and IRR whenever cost variables, tax structures, or inflation rates shift.

U5: Forecasting & Applied Financial Modelling

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Budgeting and forecasts models - revenue and cost forecasting, working capital forecasts. Key value driver and assumptions. Base, best and worst cases scenario analysis. Introduction to the concepts of investment and project finance modelling- project evaluation phases, cash flows patterns, decision making frameworks. Risk analysis and sensitivity test. Integrated financial models and presentation sheets preparation. LBO, and M&A models.

Description

Project: The Capstone Project: Integrated Enterprise Advisory Portfolio. Students form collaborative analytics squads to analyze a real enterprise experiencing a strategic expansion. Teams integrate their multi-year projection models with a live-published Power BI dashboard layout. The course culminates in a boardroom simulation presentation where squads defend their visual indicators, data transformation models, and strategic conclusions under questioning from an expert panel.

Essential Reading

1.Day,A.(2013).Mastering financial modelling in Microsoft Excel (3rd ed.).Pearson.

2.Sengupta,C.(2009).Financial analysis and modeling using Excel and VBA (2nd ed.).Wiley.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL MODELING

COURSE CODE: COM401F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

5 CIA components should take place. The total should be divided into 50 marks each.

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE - 100 Marks

COURSE NAME: ALGORITHMIC TRADING AND QUANTITATIVE FINANCE

COURSE CODE: COM401F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the principles and architecture of algorithmic trading systems and quantitative finance models.

CO2: Apply Python tools to analyze, process, and visualize financial market data.

CO3: Develop and backtest algorithmic trading strategies using Python

CO4: Evaluate trading performance using risk-adjusted return measures and optimization techniques.

CO5: Design a complete algorithmic trading project integrating strategy logic, coding, and performance reporting.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Peace, justice and strong institutions

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Algorithmic Trading and Quantitative Finance

Teaching Hours: (10)

Development Needs:

National

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U1-T1. Overview of algorithmic trading and quantitative finance - Market microstructure, order types, and trade execution - Components of an algorithmic trading system - Python environment setup for financial analytics - Importing and managing financial data using APIs (Yahoo Finance, Alpha Vantage) Project: Import stock price data from an API, compute returns and volatility, and visualize price trends.

U2: Financial Data Analysis and Time Series Modeling using Python

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U2-T1. Financial time series concepts: returns, autocorrelation, volatility clustering - Stationarity and ARIMA models - Technical indicators: moving averages, RSI, MACD - Statistical and ML/ DL-based forecasting of prices - Data preprocessing for model building. Python Libraries needed: statsmodels, scikit-learn, pandas, matplotlib Project: Build and evaluate an ARIMA-based short-term stock price predictor using python

U3: Strategy Design and Backtesting Framework

Teaching Hours: (12)

Development Needs:

Regional

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Sustainability

U3-T1. Basics of trading strategies: mean reversion, momentum, and pairs trading - Portfolio construction and optimization - Backtesting concepts: data-snooping bias, look-ahead bias - Building backtesting systems in Python - Evaluating trading performance metrics (Sharpe ratio, Sortino ratio, Max drawdown) Python Libraries: numpy, pandas, matplotlib, backtrader, pyfolio Project: Implement and backtest a momentum-based trading strategy using historical price data.

U4: Machine Learning and AI in Algorithmic Trading

Teaching Hours: (12)

Development Needs:

National

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment

U4-T1. Overview of ML techniques in finance (classification, regression, clustering) - Feature engineering and selection for financial datasets - Model evaluation and cross-validation - Reinforcement learning for trading (introductory concepts) - Risk management and position sizing Python Libraries: scikit-learn, tensorflow (optional), xgboost Project: Develop an ML-based trading signal model using historical financial indicators.

U5: Integrated Trading Systems and Capstone Project

Teaching Hours: (14)

Development Needs:

National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Integrated Trading Systems and Capstone Project

Description

Integrating data analysis, strategy logic, and execution simulation - Real-time trading simulation using Python APIs - Portfolio optimization and risk-adjusted performance measurement - Visualization and reporting dashboards using Python - Ethical, regulatory, and practical considerations in algorithmic trading

Capstone Project Options:

5. Design and backtest a multi-factor trading strategy (momentum + volatility).
5. Develop an AI-based trading bot using ML classifiers for buy/sell signals.
5. Build a portfolio optimization model integrating Sharpe ratio and risk metrics.

Essential Reading

1. Tucker Balch, M. (2020). Machine learning for algorithmic trading. Packt Publishing.
1. Lopez de Prado, M. (2018). Advances in financial machine learning. Wiley.
1. Jansen, R. (2021). Hands-on financial modeling with Python. Packt Publishing.

EXAMINATION PATTERN

COURSE NAME: ALGORITHMIC TRADING AND QUANTITATIVE FINANCE

COURSE CODE: COM401F-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I (20 marks)+ CIA II (50 marks)+ CIA III (20 Marks)

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE-100 marks

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Analyse organisational behaviour concepts, models, and interdisciplinary foundations to examine contemporary challenges such as diversity, sustainability, and green organisational behaviour.

CO2: Evaluate the influence of personality, values, attitudes, emotions, on individual behaviour, ethical conduct, employee well-being and sustainability outcomes in AI-driven work environments.

CO3: Analyse learning, perception, motivation and decision-making processes to assess behavioural change, ethical judgement, sustainability-oriented decisions, and the impact of artificial intelligence on managerial decision-making..

CO4: Analyse group dynamics, team processes, and collaborative mechanisms, including green teams and technology-enabled teams, to evaluate their effectiveness in achieving organisational and sustainability goals.

CO5: Evaluate the role of power, conflict, negotiation, resilience, leadership, organisational culture, and change in managing sustainability initiatives.

Sustainability Development Goals (SDG)

Decent work and economic growth, Gender equality, Good health and well-being, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Empathy and active listening, Leadership and social influence, Motivation and self-awareness, Quality control, Resilience flexibility and agility

Course Content

U1: Introduction to Organisational Behaviour

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. Introduction to Organisational Behaviour

Description

Meaning of Organisational Behaviour, Nature of Organisational Behaviour, Disciplines contributing to Organisational Behaviour, Challenges and opportunities for OB, Diversity in organisations, Biographical characteristics, Diversity management, Organisational Behaviour models, Green Organisational Behaviour (GOB), Sustainability and workplace behaviour, Environmental psychology in the workplace, Pro-environmental behaviour and psychological safety at work.

U2: Individual Behaviour

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Environment, Professional Ethics

U2-T1. Individual Behaviour

Description

Individual Behaviour - Factors Influencing Individual Behaviour, Personality – meaning, Type A and Type B personality, MBTI, Big Five Personality Model, Locus of Control, Core Self-Evaluation, Machiavellianism, Narcissism, Values and attitudes – importance of values, Terminal and Instrumental values, Whistle-blowing as an ethical issue in organisational behaviour, Values across cultures – Hofstede and GLOBE frameworks, Components of attitudes, Job-related attitudes, Job involvement, Job satisfaction – causes and effects Emotions and moods – emotional labour, Emotional intelligence, OB applications of emotions and moods, Stress management – work-related stress, Stress and burnout, Management of stress, Technostress and AI-driven work stress Motivation, theories of motivation - Need Hierarchy Theory, Theory X and Theory Y, Herzberg's Two-Factor Theory, McClelland's Theory of Needs.

U3: Learning, Perception and Individual Decision-Making

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Gender, Human Values, Professional Ethics

U3-T1. Learning, Perception and Individual Decision-Making

Description

Learning – definition and importance, Theories of learning - Stimulus-Response Theory, Cognitive Theory, Social Learning Theory, Principles of learning, Shaping as a managerial tool, Learning for green behaviour Perception – factors influencing perception, Attribution theory, Common shortcuts in judging people, Link between perception and individual decision-making. Decision-making in organisations, Ethics in decision-making, Artificial intelligence in managerial decision-making, and Data-driven decision-making.

U4: Foundations in Group Behaviour and Team

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U4-T1. Group Behaviour and Team Dynamics

Description

Defining and classifying groups, Tuckman's model of group development, Factors influencing group behaviour, Group properties – roles, norms, status, size, cohesiveness, Group decision- making – groupthink, group shift, Techniques in group decision-making, Transactional Analysis, Johari Window, Types of teams - green teams, virtual teams, cross-functional sustainability teams. Creating effective teams - Teams and collaborations - Technology-enabled collaboration.

U5: Power, Conflict and Negotiation – Dynamics of Organisational Behaviour

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics, Sustainability

U5-T1. Dynamics of Organisational Behaviour - Power, Conflict and Negotiation

Description

Leadership - shared leadership, transformational leadership, authentic leadership, Ethical and responsible leadership, Leadership for sustainability Power – meaning and sources, Power and politics in organisations, Conflict – process, sources and outcomes, Conflict management, Negotiation process, Negotiation strategies, Global implications of negotiation Organisational culture – definition and functions, Creating and sustaining culture, Organisational culture and climate, Creating a culture for sustainability and innovation, Green organisational culture, Spirituality and organisational culture. Organisational change – meaning, forces for change, Resistance to change – overcoming resistance to change, Approaches to managing organisational change, Behavioural change for sustainability.

Essential Reading

1. Luthans, F., Doh, J. P., & Luthans, B. C. (2021). Organizational Behavior: An Evidence-Based Approach (14th ed.). Information Age Publishing.
1. McShane, S. L., & Von Glinow, M. A. (2021). Organizational Behavior: Emerging Knowledge, Global Reality (9th ed.). McGraw-Hill Education.

EXAMINATION PATTERN

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid-semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: BUSINESS POLICY AND STRATEGIC MANAGEMENT

COURSE CODE: COM402-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the fundamental concepts, evolution, and scope of business policy and strategic management, and articulate the role of strategic intent and governance in modern organizations.

CO2: Analyze the external and internal business environment using strategic tools such as PESTEL, Porter's Five Forces, value chain, RBV, and SWOT to identify strategic issues and opportunities.

CO3: Formulate appropriate business-level, corporate-level, and global strategies—including innovative and sustainable options—based on organizational capabilities and environmental conditions

CO4: Apply strategic models to implement strategies effectively through appropriate structures, leadership, culture, resource allocation, and ethical practices, addressing challenges in strategic change.

CO5: Evaluate organizational strategies using strategic control systems, KPIs, the Balanced Scorecard, and sustainability/ESG metrics to enhance performance and long-term value creation.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Empathy and active listening, Leadership and social influence, Motivation and self-awareness, Quality control, Resilience flexibility and agility

Course Content

U1: Introduction to Business Policy and Strategic Management

Teaching Hours: (12)

Development Needs:

Global, Local, National

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U1-T1. Introduction to Business Policy and Strategic Management

Description

Definition, nature and scope of Business Policy; Evolution of Strategic Management as a field; Concepts of Strategy and Strategic Management; Levels of strategy — corporate, business, and functional; Strategic intent — vision, mission, goals, and objectives; Strategic fit and strategic flexibility; The role of

strategic management in sustainability and corporate governance.

U2: Environmental and Internal Analysis

Teaching Hours: (12)

Development Needs:

Global, Local, National

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U2-T1. Environmental and Internal Analysis

Description

Environmental scanning: PESTEL, Porter's Five Forces Model; Industry life cycle analysis; Competitor analysis and benchmarking; Internal environment: resource-based view (RBV), value chain analysis, core competencies, VRIO framework; SWOT analysis and strategic gap analysis.

U3: Strategy Formulation

Teaching Hours: (14)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U3-T1. Strategy Formulation

Description

Business-level strategies: Cost leadership, differentiation, and focus; Corporate-level strategies: growth, stability, retrenchment, diversification, mergers and acquisitions, strategic alliances, joint ventures, international strategies; Blue Ocean strategy; Global strategic options in the digital era. Integrating core strategic management themes, environmental analysis, competitive advantage, corporate & business-level strategy, and governance with AI-enabled strategic intelligence, scenario planning, decision support systems, & platform strategies.

U4: Strategy Implementation

Teaching Hours: (10)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U4-T1. Strategy Implementation

Description

Organizational structure and strategy; Resource allocation; Leadership and culture in strategy

implementation; Managing strategic change and innovation; Business ethics and corporate social responsibility in strategy execution; Managing resistance and building commitment.

U5: Strategy Evaluation and Control

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U5-T1. Strategy Evaluation and Control

Description

Nature, importance, and process of strategy evaluation; Strategic control systems; Balanced Scorecard and Key Performance Indicators (KPIs); Measuring strategic effectiveness and organizational performance; Strategic audit; Contemporary issues — digital disruption, sustainability strategy, ESG integration. Embedding green perspectives through sustainability-driven strategy, climate risk assessment, circular & regenerative models, ESG integration, and long-term value creation would help learners engage with strategy as a tool for resilience.

Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: INTERNATIONAL FINANCE AND GLOBAL MARKETS

COURSE CODE: COM402F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Analyze the international financial environment, including the monetary system, the Balance of Payments, and global capital markets like those for Masala Bonds and ADRs/GDRs.

CO2: Evaluate the theories of exchange rate determination like PPP and IRP and apply forecasting techniques to understand currency movements.

CO3: Analyze, measure, and differentiate between the various types of foreign exchange exposures—transaction, translation, and economic—while also assessing political risk.

CO4: Develop and apply appropriate risk management strategies using both internal techniques like netting and external derivative instruments like forwards, options, and swaps.

CO5: Assess multinational capital budgeting decisions like FDI and critically examine the impact of emerging trends, including FinTech, CBDCs, and Sustainable Finance on global markets.

Sustainability Development Goals (SDG)

Affordable and clean energy, Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, No poverty, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Resilience flexibility and agility

Course Content

U1: The International Financial Environment

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. International vs. Domestic Finance. Globalization and the Multinational Corporation (MNC). The Balance of Payments (BOP) framework and its interpretation. International Monetary System: A critical review of the evolution from the Gold Standard to the Bretton Woods system and the current managed-float regime. Parity Conditions: A deep dive into PPP, IRP, and the International Fisher Effect (IFE). Introduction to Parity Anomalies: A conceptual look at failure of these theories.

U2: Foreign Exchange (Forex) Market and Forecasting

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Market Mechanics: Structure of the global forex market (spot, forward, futures, swaps). Key participants and the role of arbitrage (locational, triangular, covered interest). **Exchange Rate Determination:** Factors influencing exchange rates (economic fundamentals, central bank intervention, market sentiment). **Introduction to Forex Forecasting:** Market-Based Forecasts (using forward rates). **Fundamental Forecasting** (using economic models like PPP). **Technical Analysis.** UCITS tools.

U3: International Financial Markets and Institutions

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Global Capital Markets: Eurocurrency markets (Eurodollars), International Bond Markets (Eurobonds, Foreign Bonds). **Indian Context:** Offshore Rupee Instruments, specifically Masala Bonds, and the framework for External Commercial Borrowings (ECB). **International Equity Markets:** Raising capital globally: Cross-listing and strategic rationale. **Depository Receipts (DRs):** ADRs/GDRs and IDRs.

U3-T2. India's Integration with Global Markets: The role and impact of Foreign Portfolio Investors (FPIs) on Indian capital markets. **Introduction to India's Capital Account Convertibility (CAC)** and its current status. **International Institutions:** Role and impact of the IMF, World Bank, WTO and Bank for International Settlements (BIS), relationship with India. **International Asset Pricing:** Introduction to the International CAPM, benefits of global diversification, and the 'home bias' puzzle.

U4: Foreign Exchange Risk and Exposure

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U4-T1. Defining and Measuring Exposure: Transaction Exposure: Risk from contractual foreign currency payables/receivables. **Translation (Accounting) Exposure:** Risk in consolidating foreign-subsidary financials. **Economic (Operating) Exposure:** Long-term risk to the firm's competitive position. **Political and Country Risk:** Assessing and managing risks like expropriation, currency inconvertibility, and regulatory changes.

U5: Hedging Strategies and Derivatives

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Internal Hedging Techniques: Leading and lagging, multilateral netting, and price invoicing. External Hedging Instruments (Application): Managing risk with Forwards and Futures contracts. Money Market Hedging. Hedging with Options (Puts and Calls): Strategies and cost-benefit analysis. Introduction to Swaps (Currency and Interest Rate). Managing Economic and Translation Exposure: Strategic, operational, and financial hedges. U6: Multinational Investment and Emerging Trends

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U6-T1. Foreign Direct Investment (FDI): Motives, strategic considerations, and political risk assessment. International Capital Budgeting: Process of evaluating foreign projects. Adjusting cash flows vs. discount rates for country risk. Introduction to the Adjusted Present Value (APV). Emerging Trends in Global Finance: Impact of Blockchain on trade finance, supply chain management, and cross-border payments. Central Bank Digital Currencies (CBDCs): payment efficiency, financial inclusion.

U6-T2. Models (Wholesale vs. Retail CBDCs). CBDCs and the International System: Implications for cross-border payments, correspondent banking, and the potential impact on systems like SWIFT. The Move to a Global Cashless Economy: Drivers: Mobile payments, FinTech innovation, and policy pushes. Impact on global e-commerce, international remittances, and financial transparency. Regulatory and security challenges in a digital-first financial world. Sustainable Finance: ESG, green and blue bond markets.

EXAMINATION PATTERN

COURSE NAME: INTERNATIONAL FINANCE AND GLOBAL MARKETS

COURSE CODE: COM402F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COM403F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the concept, characteristics, and role of alternative investments in a portfolio.

CO2: Differentiate between traditional and alternative asset classes.

CO3: Analyze hedge funds, private equity, real estate, commodities, and structured products.

CO4: Evaluate risk-return profiles and performance measurement techniques of alternative investments.

CO5: Understand regulatory, ethical, and operational aspects associated with alternative assets and apply portfolio diversification strategies using alternative assets.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility, Technological literacy

Course Content

U1: The Alternative Investment Landscape & Portfolio Theory

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Definition and evolution of alternative investments, Differences between traditional and alternative assets, Liquid vs. Illiquid assets, Role in portfolio diversification, Market players and trends, Overview of major asset classes. , Private Credit Boom- (Direct Lending, Distressed Debt, Mezzanine Financing). The "Democratization" of alternatives (retail access). Portfolio Construction: The Yale Model (Endowment Model) vs. Traditional 60/40 portfolios.

U2: Hedge Funds

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Structure, strategies, and classifications (long/short, event-driven, global macro, arbitrage), Directional: Global Macro, Managed Futures. Event-Driven: Distressed Debt,

Merger Arbitrage, Relative Value: Long/Short Equity, Fixed Income Arbitrage. Risk-return characteristics, Hedge fund performance evaluation (Sharpe, Sortino, Information ratio), Fees and incentives (2 & 20 model), Regulatory and ethical issues. Case Study Discussion: The Collapse of Long-Term Capital Management (LTCM) - A lesson in leverage and correlation breakdown

Description

Case Study Discussion: The Collapse of Long-Term Capital Management(LTCM) - A lesson in leverage and correlation breakdown

U3: Private Equity and Venture Capital

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics, Sustainability

U3-T1. Structure of private equity funds, Stages of investment: venture capital, growth capital, buyouts, The PE Lifecycle: Fundraising, Deal Sourcing, Value Creation, and Exit. Valuation of private firms (DCF, multiples, comparables), Strategies: Venture Capital (Seed to Series C), Growth Equity, and Leveraged Buyouts (LBOs). Exit routes: IPO, M&A, secondary sale. Case studies: Blackstone, Sequoia Capital.

U4: Real Estate and Infrastructure Investments

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Background of Real Estate Funds in India, Commencement of REIT in India, Types: residential, commercial, REITs, infrastructure funds, Real estate valuation techniques, Risks and returns in property investment, Global and Indian REIT market trends, Performance of Indian REIT Case Discussion on Embassy REIT, IndiGrid, InvIT, Power Grid InvIT.

U5: Commodities and Derivatives & Structured Products and Other Alternatives

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Physical vs. derivative-based commodity investment, Types of Commodities traded in the market, Commodity indices and ETFs, Pricing dynamics and risk management, Role in inflation hedging and portfolio diversification, Activity: Live commodity market tracking and report, Overview of structured notes, CDOs, CLOs, MBS, Infrastructure funds, art funds, collectibles, and Digital Assets. Risk-return implications.

U6: Global and Indian regulatory framework (SEBI, AIF Regulations 2012)

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U6-T1. SEBI (Alternative Investment Funds) Regulations, 2012. Categories I, II, and III AIFs. Ethics in alternative investing, Due Diligence (DD): Investment DD vs. Operational DD (Checking the "back office" to prevent fraud).BRSR framework, ESG and sustainability in alternatives, Future of alternative assets (tokenization, AI, green infrastructure funds). Ethics & ESG: Greenwashing in impact funds; Ethical conflicts in short-selling and asset stripping. Essential Reading

- CAIA Level I: An Introduction to Core Topics in Alternative Investments – CAIA Association
- Alternative Investments: Instruments, Performance, Benchmarks, and Strategies by Donald R. Chambers et al.
- Private Equity: History, Governance, and Operations – Harry Cendrowski
- Hedge Funds: Quantitative Insights – François-Serge habitant

EXAMINATION PATTERN

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COM403F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

20 Marks CIA 1

50 Marks MSE

20 Marks CIA 3

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Question Paper Pattern for End Term Examination (ETE)

Written examination conducted for 3 hours duration: Sections Type Marks
A Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks $7 \times 5 = 35$
B Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks $5 \times 10 = 50$
C Case Study (Compulsory) $1 \times 15 = 15$

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

COURSE TYPE: Practical

TOTAL HRS: 8 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Identify and define a domain related research problem that requires data-driven analysis.

CO2: Apply financial, statistical, and computational tools to analyze real-world data.

CO3: Analyze relationships and patterns within financial datasets using appropriate models.

CO4: Evaluate the robustness and reliability of analytical outcomes.

CO5: Design and present a data-driven solution or model that addresses a financial problem

Sustainability Development Goals (SDG)

Industry, innovation and infrastructure, Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Project Submission Phases

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. Phases of Project: Phase 1: Orientation and Proposal Development Weeks 1–2 - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process Project proposal (Title, objectives, rationale, data source, methodology) Phase 2: Literature Review and Conceptual Framework Weeks 3–4 - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building conceptual and analytical framework Literature review report and research design Phase 3: Data Collection and Preparation Weeks 5–6 - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis. Cleaned dataset and exploratory data analysis report Phase 4: Model Building and Analysis Weeks 7–11 - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing

Description

Phase | Weeks | Focus Area | Expected Deliverables | Phase 1: Orientation and Proposal Development | Weeks 1–2 | - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process | Project proposal (Title, objectives, rationale, data source, methodology) | Phase 2: Literature Review and Conceptual Framework | Weeks 3–4 | - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building a conceptual and analytical framework | Literature review report and research design | Phase 3: Data Collection and Preparation | Weeks 5–6 | - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis | Cleaned dataset and exploratory data analysis report | Phase 4: Model Building and Analysis | Weeks 7–11 | - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing | Analytical model with output, interpretation, and visualizations | Phase 5: Report Writing and Presentation | Weeks 12–15 | - Structuring report (Abstract, Methodology, Results, Conclusion)- Final presentation and viva preparation | Final report, project presentation, and viva voce | Phase 6: Evaluation and Reflection | Week 16 | - Final evaluation by panel- Reflection on learning outcomes | Evaluation report and reflective summary |

U2: Suggested Project Themes

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U2-T1. ♦ Financial Markets & Investment Analytics • Predicting stock price movements using machine learning • Sentiment analysis of financial news and its impact on stock returns • Portfolio optimization using risk-return analytics • Volatility modeling using GARCH or ARIMA models ♦ Corporate Finance & Valuation • Startup valuation using financial ratios and cash flow models • Financial distress prediction using logistic regression or random forest • Cost of capital and capital structure optimization ♦ Banking & Risk Analytics • Credit risk modeling using historical default data • Loan default prediction using classification algorithms • Value-at-Risk (VaR) and Expected Shortfall computation for portfolios ♦ Macroeconomics & Policy Analysis • Exchange rate forecasting using time series models • Impact of macroeconomic indicators on stock market performance • Inflation forecasting using ARIMA or regression techniques

Description

Financial Reporting & ESG Analytics • ESG disclosure sentiment analysis using NLP

- Financial statement fraud detection using anomaly detection
- Earnings call transcript analysis and its impact on firm performance

EXAMINATION PATTERN

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Evaluation and Assessment Structure (100 Marks)

Component | Weightage | Evaluation Criteria | Project Proposal | 10% | Clarity of problem statement, feasibility, and research plan | Literature Review | 10% | Depth of review, conceptual framework | Data Preparation & Analysis | 20% | Data quality, methodology, and statistical rigor | Model Building & Findings | 25% | Accuracy, interpretation, and innovation | Final Report | 20% | Structure, clarity, referencing, and conclusions | Presentation & Viva | 15% | Communication, defense, and analytical insights |

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

COURSE TYPE: Practical

TOTAL HRS: 30 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Apply theoretical knowledge to real-world business environments

CO2: Demonstrate professional skills and workplace competencies

CO3: Critically analyse business operations and organizational practices

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals 21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Empathy and active listening, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to the Organization

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. 1.1 Profile of the organization (including evolution, awards and recognition) 1.2

Vision, Mission, Goals

U2: Organizational Design and Functional Areas

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U2-T1. 2.1 Organization design & structure 2.2 Departments and Divisions 2.3 Product/s and Service/s 2.4 Business Model

Description

- Hierarchical/flat/matrix structure (include organogram if possible) • Overview of key functional

departments • Major offerings, features, target market • Revenue generation, customer acquisition, delivery mechanism

U3: Key Performance Areas (KPA's), Organizational Control and Strategies

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. 3.1 KPA's of the various departments 3.2 Accounting Standards & Reporting followed 3.3 HR Practices 3.4 Financial Highlights 3.5 Modes of Marketing 3.6 Integration of AI 3.7 Tax Filing & Auditing 3.8 SWOC Analysis of the Organization (Based on the intern's observation and analysis supported by facts)

Description

KPAs across various departments (Sales, HR, Finance, etc.) • IND AS, internal reporting systems, compliance frameworks • Recruitment, appraisal, training, and retention strategies • Key financials (Turnover, Profit, Investments – if available) • Digital, traditional, B2B/B2C approaches, branding • Use of AI, automation tools, ERP systems, CRM tools • Tax practices, statutory audit process, internal audits • Strengths, Weaknesses, Opportunities, Challenges • Factors driving organisational growth and sustainability • Intern's strategic operational recommendations

U4: Course Learning Outcomes and Conclusion

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics, Sustainability

U4-T1. 4.1 Applications of Theoretical Knowledge to Real-World Business Environments 4.1.1 Relevance of Academic Theories (Accounting, Finance, HR, etc.) 4.1.2 Gaps or Irrelevance Identified 4.2 Professional Skills and Workplace Competencies 4.2.1 New Skills Acquired During Internship 4.2.2 Existing Skills Nurtured or Strengthened 4.2.3 Skills/Competencies Identified for Further Development 4.2.4 Input from Key Personnel

Description

4.3 Critical Analysis of Business Operations and Practices

4.3.1 Good Business Practices Observed

4.3.2 Practices Worth Replicating at CHRIST University

Conclusion

Summary of internship experience

Key takeaways and reflections

Impact of internship on career readiness

EXAMINATION PATTERN

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Assessment (Marks Distribution) Weekly Report Submission - 40 Marks Industry Mentor's Evaluation - 20 Marks Internship Mentor's Evaluation - 40 Marks Internship Report Evaluation - 50 Marks Viva Voce Examination - 50 Marks Total - 200 Marks

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, necessity, and defining characteristics of quantitative research, and distinguish it from qualitative research

CO2: Design a basic survey framework by identifying suitable sampling methods, data collection modes, and approaches to minimize non-response bias.

CO3: Develop valid and reliable survey instruments through appropriate question design, scaling, and pretesting techniques.

CO4: Evaluate experimental designs and identify strategies to ensure validity, control variables, and derive causal inferences in business research.

CO5: Perform and interpret statistical analyses ethically, integrating quantitative findings into evidence-based business decision-making.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Motivation and self-awareness, Technological literacy

Course Content

U1: Foundations of Quantitative Research

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Quantitative Research -. Nature, Necessity, and Importance - Relevance and Urgency in the Data-Driven Era (ADHOGS & DVUCA) - Defining Characteristics: Scope, Objectivity, Goal, Data, and Method - Quantitative vs. Qualitative Research - Strengths and Shortcomings

U2: Introduction to Survey Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Survey Research – Meaning and Purpose – When and Why Surveys Are Used – Types of Surveys (Cross-Sectional, Longitudinal) – Sampling in Survey Research (Sampling Frame, Probability & Non-probability Methods) – Non-response and Bias Reduction – Modes of Survey Data Collection (Mail, Telephone, Online, Face-to-Face) – Implementation and Ethical Considerations

U3: Advanced Considerations in Survey Research

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Designing Good Measures – Question Design and Wording – Scales and Response Formats – Reliability and Validity of Instruments – Pre-testing and Pilot Studies – Survey Implementation and Interviewer Training – Data Preparation (Coding, Cleaning, Data Entry) – Ethical and Error Perspectives (Total Survey Error, Bias Control)

U4: Experimental Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Experimental Research – Concept and Purpose – Independent and Dependent Variables – Randomization and Control – True, Quasi-, and Field Experiments – Internal and External Validity – Threats to Validity and Control Techniques – Practical Applications in Commerce and Management Contexts – Ethical Issues in Experimental Studies

U5: Data Analysis in Quantitative Research

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Data Preparation – Handling Missing Data and Outliers – Testing Assumptions (Normality, Linearity, Multicollinearity) – Descriptive and Inferential Statistics (Mean, SD, t-test, ANOVA, Correlation, Regression) – Multivariate Analysis (Factor Analysis, CB-SEM, PLS-SEM) – Hypothesis Testing and Error Types (I–IV) – Effect Size and Statistical Power – Interpreting and Reporting Results – Ensuring Reproducibility and Ethical Reporting
Essential Reading

1. Fowler, F. J. (2025). Survey research methods (Reprint 5th ed.). SAGE Publications.
1. Campbell, D. T., & Stanley, J. C. (2025). Experimental and quasi-experimental designs for research. Ravenio Books.
1. Field, A. (2025). Discovering statistics using IBM SPSS statistics (5th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA -III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35

Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, design process, and ethical considerations of qualitative research.

CO2: Distinguish among the five qualitative research approaches and identify suitable designs for business contexts.

CO3: Develop qualitative research problems, purpose statements, and research questions aligned with study objectives.

CO4: Apply appropriate methods for qualitative data collection, coding, and thematic analysis using software tools.

CO5: Write and evaluate qualitative research reports incorporating reflexivity, validation, and ethical standards.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Technological literacy

Course Content

U1: Designing a Qualitative Study

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Qualitative Research – Meaning - Characteristics and purpose of qualitative research - When to use qualitative research - Ethical considerations and preliminary design issues - Steps in the qualitative research process - Components of a qualitative research proposal.

U2: Five Qualitative Approaches to Inquiry

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development
Cross Cutting Issues:
Professional Ethics

U2-T1. Overview of five approaches – Narrative, Phenomenological, Grounded Theory, Ethnographic, and Case Study – Definition, features, and procedures of each approach – Application in business and management research – Challenges in each approach – Comparison of approaches.

U3: Introducing and Focusing the Study

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Formulating the research problem – Developing purpose and research questions – The central question and sub-questions – Aligning research questions with the chosen qualitative approach – Writing qualitative purpose statements and research questions.

U4: Data Collection, Analysis and Representation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Data Collection: Meaning and process of data collection in qualitative studies – The data collection circle – Selection of sites and participants – Purposeful sampling strategy – Forms of data: interviews, observations, documents, audiovisual materials – Field issues and ethical considerations.

U4-T2. Data Analysis and Representation: Organising, coding, and categorising qualitative data – Data analysis spiral – Thematic analysis – Representing and visualising data – Introduction to qualitative software (NVivo, Atlas.ti, MAXQDA).

U5: Writing, Validation and Evaluation in Qualitative Research

Teaching Hours: (8)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Writing qualitative research reports – Structure and style – Reflexivity and representation – Validation and reliability in qualitative research – Strategies for trustworthiness – Evaluation standards for qualitative studies.

Essential Reading

Creswell, J. W., & Poth, C. N. (2025). *Qualitative Inquiry and Research Design: Choosing Among Five Approaches* (4th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA - III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35 Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

COURSE TYPE: Practical

TOTAL HRS: 360 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Demonstrate the ability to plan and execute a research project within defined time constraints and available resources.

CO2: Perform a substantial review of literature relevant to the chosen research topic to justify the significance of the study.

CO3: Demonstrate mastery of quantitative or qualitative research skills applicable to commerce and management contexts.

CO4: Demonstrate a clear knowledge and understanding of ethical standards in data collection, reporting, and academic integrity

CO5: Demonstrate effective communication of complex business concepts through both a written document and an oral presentation

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking, Creative thinking, Dependability and attention to detail, Technological literacy

Course Content

U1: Dissertation Proposal

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Before beginning the full dissertation, candidates must submit a proposal that proves the research is novel, significant, and feasible.

Description

Content and Structure• Specific Aims: Concisely state research goals, hypotheses (if applicable), and the expected impact on management practices or commerce theory.

Research Strategy:• Significance: Explain the critical barrier in commerce/management the project addresses and how it improves existing professional knowledge.

- Innovation: Describe any novel theoretical frameworks, methodologies, or applications that challenge current business paradigms.
- Approach: Detail the methodology (e.g., quantitative, qualitative, or mixed methods) and data analysis plans.
- Timeline and Milestones (1 page): A outline of benchmarks, from data collection to the final defense.
- Preliminary Studies: Discuss any initial data or pilot studies conducted to establish the feasibility of the project.

U2: Dissertation Structure

Teaching Hours: (295)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Dissertation is divided into three parts - Preliminary Pages, Main Body and End Matter

Description

PRELIMINARY PAGES

1. Title Page - Title of the Dissertation, Student Name & Register Number, Programme: BCom (Honours) with Research, Department / Institution Name, Supervisor Name & Designation, Academic Year 2. Declaration by the Student - Certificate from the Supervisor, Acknowledgements (Optional but recommended) 3. Abstract - 200–300 words, Background, Objectives, Methodology, Key findings, Keywords (4–6) 4. Table of Contents 5. List of Tables 6. List of Figures (if applicable) 7. List of Abbreviations (if applicable)

B. MAIN BODY OF THE DISSERTATION

Chapter I – Introduction - Background of the Study, Conceptual / Theoretical Context, Statement of the Problem, Need and Significance of the Study, Objectives of the Study, Research Questions , Scope of the Study, Limitations of the Study, Chapterisation Scheme

Chapter II – Review of Literature and Hypotheses Development - Introduction, Review of International Studies, Review of National Studies, Research Gap Identification, Conceptual Framework / Research Model (if applicable), Hypothesis Development Chapter - 3 Research Methodology

Chapter - 4 Data Analysis and Interpretation

Chapter V – Findings, Suggestions and Conclusion

END MATTER

References and Appendices

U3: Other Guidelines

Teaching Hours: (5)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Font Style: Times New Roman Font Size (Preliminary Pages): 14 point (e.g., Title Page, Abstract, Table of Contents). Font Size (Main Body): 12 point. Line Spacing: 1.5 spacing throughout (No double spacing). Margins: One inch on all sides. APA 7th edition guidelines to be followed. Final Viva Voce Examination. Students are encouraged to present their work in the conferences. They are also encouraged to convert their research into Scopus, WoS, or ABDC publications.

EXAMINATION PATTERN

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA Overall = 300
