

COMMERCE

2026

DEPARTMENT VISION AND MISSION

a. Vision Statement:

To be a centre of excellence in the realm of Commerce and Management, developing and nurturing global competencies in students through quality education, research and continuous innovation.

b. Mission Statement:

M1: To nurture commerce professionals who possess a high level of knowledge and competence to effectively contribute to society with commitment and integrity.

SYLLABUS FOR

COURSE NAME: GLOBAL INVESTMENT STRATEGIES

COURSE CODE: COFI401-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the structure and functioning of global financial markets and institutions

CO2: Explain the nature and characteristics of various securities and its valuation.

CO3: Evaluate risk–return dynamics and construct diversified global investment portfolios.

CO4: Apply quantitative models and behavioral insights to design effective global investment strategies.

CO5: Support ethical and sustainable decision-making in international investment management and introduce new paradigm

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Technological literacy

Course Content

U1: Introduction to Global Investment Frameworks

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Introduction to Global Investment Frameworks

Description

Global investment environment, evolution and significance; international capital markets, structure and participants. Role of institutional investors, overview of international monetary systems, challenges in cross-border investments. Structure, components, and roles of international financial markets and institutions. Exchange rate systems and currency markets; balance of payments and capital flows; global financial linkages; impact of macroeconomic indicators (interest rates, inflation, GDP) on investment decisions; Concept of sustainable investing, role of investment in climate change.

U2: Financial Instruments and Asset Classes

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Financial Instruments and Asset Classes

Description

Securities including equities (stocks), fixed income (bonds), money market instruments, mutual funds. Derivatives in global markets. Forwards, futures, Participants and Functions, valuation problems. ADRs and GDRs. Green instruments.

U3: Portfolio Construction and Risk Management

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Portfolio Construction and Risk Management

Description

Risk- Risk and Uncertainty – Causes for risk – Types of Risk- Systematic and Unsystematic risk Expected risk return trade-off - Calculation of expected return- calculation of risk- Beta. Portfolio management process, Portfolios return, Portfolio risk, International portfolio diversifications. Feasible set of portfolios, Efficient set of portfolios, Selection of optimal portfolio, Markowitz model. Role of AI in portfolio management.

U4: Sectoral Risk Analysis

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Sectoral Risk Analysis

Description

Sectoral risk analysis: agriculture, energy, transport, and finance, Climate resilience, disaster risk reduction, and insurance mechanisms, Purchasing Power Parity (PPP), Interest Rate Parity (IRP). Technological innovations for mitigation. Case studies on successful adaptation models (India and global), how big investment companies use AI.

U5: Innovations and Ethics in Global Investment

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Innovations and Ethics in Global Investment

Description

Role of technology in global financial markets. Fintech and Cryptocurrency. Ethical and sustainable decision-making in international investment management. Issues of data privacy and cybersecurity in digital investing. Climate change, social responsibility and governance as investment factors. Case Study Analysis: Detailed analysis of real-world global investment decisions, covering successes and failures.

Essential Reading

11. Punithavathy Pandian. (2013) Security analysis and portfolio management, (2ed.), Vikas publishing house Pvt Ltd. New Delhi
- 2.2. S, Kevin. (2015). Security Analysis and Portfolio Management. New Delhi: Prentice Hall of India.

EXAMINATION PATTERN

COURSE NAME: GLOBAL INVESTMENT STRATEGIES

COURSE CODE: COFI401-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I (20 MARKS) + CIA II (50 MARKS) + CIA III (20 MARKS)

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE 100 MARKS

COURSE NAME: WEALTH MANAGEMENT AND ASSET ALLOCATION

COURSE CODE: COFI401-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Understand and explain the nature, objectives, and scope of wealth management including the role of wealth managers, client relationship models, and applicable regulatory and ethical considerations.

CO2: Analysing and apply the financial planning process including client data analysis, risk profiling, and goal-based management to develop tailored financial plans.

CO3: Apply strategic and tactical asset allocation techniques, including risk profiling and quantitative tools, to design and manage diversified investment portfolios aligned with client goals.

CO4: Analyse diversified investment portfolios by examining risk budgeting, liquidity considerations, performance measurement, and rebalancing strategies using modern portfolio analytics tools.

CO5: Analyse ethical standards, regulatory frameworks, client protection measures, and professional codes of conduct to examine their implications and interrelationships in responsible wealth advisory practices.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, No poverty

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundation of wealth management

Teaching Hours: (10)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U1-T1. Nature, objectives, and scope of wealth management, Role of wealth managers and client relationship models, Regulatory environment and ethical considerations,

Development Needs: Professional ethics; Cross-Cutting Issues: Fiduciary responsibility.

Description

U2: Client Profiling and Financial Planning

Teaching Hours: (12)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

None

U2-T1. Financial Planning: Background, Role of Financial Planner, Financial Planning Process, Financial planning and goal-based management, Client Data Collection, Client Data Analysis, Life Cycle, Wealth Cycle, Risk Profiling and Asset Allocation innovators.

Description

U3: Asset Allocation Principles

Teaching Hours: (12)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

None

U3-T1. Risk Profiling, Why Asset Allocation? Strategic and tactical asset allocation approaches, Fixed Asset Allocation, Flexible Asset Allocation, Overview of asset classes: equities, debt, alternatives, real assets, Quantitative tools: Mean-variance optimization, Monte Carlo simulation, Behavioural biases in asset allocation.

Description

U4: Portfolio Construction and Management

Teaching Hours: (14)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

None

U4-T1. Portfolio design principles including diversification, risk budgeting, and liquidity considerations; portfolio performance measurement and monitoring; rebalancing strategies and tactical shifts; and technology and tools for portfolio monitoring and analysis. Gift city and LRS route investment.

Description

U5: Ethical Conduct, Regulation, and Trends

Teaching Hours: (12)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

None

U5-T1. Ethical standards and principles, Regulatory frameworks, Client protection, professional codes of conduct, Global standards and ethics for wealth advisory, Fintech in

wealth management, Robo- advisory, ESG, Sustainable and Responsible investing.
Description

Essential Reading

1The Intelligent Asset Allocator: How to Build Your Portfolio to Maximize Returns and Minimize Risk
(2000) by William J. Bernstein

EXAMINATION PATTERN

COURSE NAME: WEALTH MANAGEMENT AND ASSET ALLOCATION

COURSE CODE: COFI401-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: CLIMATONOMICS

COURSE CODE: COM401-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the interlinkages between climate systems, economic growth, and sustainability frameworks.

CO2: Analyze the economic impacts of climate change and evaluate the effectiveness of policy tools such as carbon pricing, green taxes, and emissions trading.

CO3: Design innovative and sustainable financial or policy models that promote low-carbon transitions and circular economies.

CO4: Apply climatonic principles to assess sectoral risks and develop adaptive strategies for businesses, communities, and governments.

CO5: Demonstrate leadership and ethical responsibility in formulating evidence-based, climate-resilient economic decisions

Sustainability Development Goals (SDG)

Affordable and clean energy, Climate action, Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Climatedonomics

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Foundations of Climatedonomics Introduction to Climatedonomics: Definition, scope, and significance, Climate science fundamentals and the economics of environmental degradation, Climate externalities and market interdependencies, Sustainable development frameworks: UN Sustainable Development Goals (SDGs), Triple Bottom Line, and Planetary Boundaries, Concept of green economy and low-carbon development pathways

Description

U2: Economic Impacts and Policy Instruments of Climate Change

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Economic Impacts and Policy Instruments of Climate Change Relationship between GDP growth, resource consumption, and emissions, Economic impacts of climate change: adaptation vs. mitigation costs, Policy instruments for climate management – carbon pricing, emissions trading, green taxes, and subsidies, Climate policy frameworks: Kyoto Protocol, Paris Agreement, and COP outcomes, Case studies: EU Emissions Trading System (EU ETS) and India's Perform–Achieve–Trade (PAT) Scheme

Description

U3: Green and Sustainable Finance Mechanisms

Teaching Hours: (15)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Green and Sustainable Finance Mechanisms Green bonds, ESG investing, and sustainable finance principles; role of development banks and institutional investors in climate finance; risk assessment, disclosure, and sustainability reporting frameworks (TCFD, GRI); financing circular economy and renewable energy transitions; designing green business and investment models. Add Practical Elements: ·Case Study (India): Examine India's Sovereign Green Bond (2023 issue) — structure, pricing, investor r

Description

U4: Climate Risk Management and Adaptive Strategies

Teaching Hours: (15)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Climate Risk Management and Adaptive Strategies Sectoral risk analysis: agriculture, energy, transport, and finance, Climate resilience, disaster risk reduction, and insurance mechanisms, Public–private partnerships for adaptation and resilience building, Technological innovations for mitigation (AI, IoT, green tech), Case studies on successful adaptation models (India and global). Add Practical Elements: ·Risk Mapping Exercise: Students create a simple climate risk profile for an Indian sect

Description

U5: Ethics, Leadership, and Climate Governance

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Ethics, Leadership, and Climate Governance Ethical dimensions of climate economics and intergenerational equity, Global governance for climate action: UNEP, IPCC, IMF, World Bank, Corporate responsibility and climate disclosure practices, Leadership in sustainability: case studies of climate champions and policy innovators, Practical exercises in sustainable decision-making and climate ethics.

Description

Essential Reading

1.Green and Sustainable Finance: Principles and Practice (3rd Ed., 2025) by Simon Thompson provides a comprehensive guide to how finance, regulation, and innovation drive-global-climate-and-sustainability-transitions.

Principles of Sustainable Finance (2nd Ed.,2023) by Dirk Schoenmaker and Willem Schramade explains how financialsystems and economic decisions can align with environmental and socialsustainability within planetary boundaries

EXAMINATION PATTERN

COURSE NAME: CLIMATONOMICS

COURSE CODE: COM401-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I (20 marks), CIA II (50 marks), CIA III (20 marks)

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions, out of which six and seven have internal choice). Each question carries five marks | $7 \times 5 = 35$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions, out of which two questions are internal choice). Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: FINANCIAL MODELING

COURSE CODE: COM401F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Apply the concept of financial modelling with respect to business decisions and framing strategies.

CO2: Analyse financial statements to derive insights about business performance.

CO3: Develop forecasts based on realistic assumptions and market conditions.

CO4: Apply strategic analysis tools alongside financial modelling techniques to inform business decisions.

CO5: Construct robust financial models using advanced Excel techniques.

Sustainability Development Goals (SDG)

Decent work and economic growth, Gender equality, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Financial Architecture

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Reviewing the significance, core blocks, and operational goals of structured models in corporate governance. Establishing professional formatting frameworks: FAST design guidelines, color-coding models (input sheets, calculation blocks, output displays), and row indexing structures. High-speed manual layout execution tools: keyboard shortcut navigation paths, freezing layout panels, row sorting filters, and data validations. Advanced formula modeling: deploying multi-level logic statements (IF, AND, OR), data tracking parameters (VLOOKUP, INDEX-MATCH), and time-value metrics (CAGR, simple IRR). Integrating conversational AI modeling assistants as formula coaches to write clean logic strings and identify broken references. Designing error-isolation panels, balancing diagnostic view grids, and net cash reconciliation checks to ensure absolute model stability without hardcoded data plugs.

Description

Project: Historical Three-Statement Corporate Core Builder. Students select a listed public company and download its raw financial filings for the past 3 years. Using AI prompting students to clean, format, and

structure the unorganized figures into an international-standard spreadsheet database template, completely backed by automated error check validation panels to prove the sheets balance dynamically.

U2: Visual Dashboarding

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Shifting out of flat tabular charts into dynamic cross-platform data visualizations using Microsoft Power BI Desktop. Ingesting disjointed transactional data sources safely. Data engineering inside the Power Query Editor environment: previewing data column qualities, formatting data types, removing blank cells, splitting text strings, and deleting nested duplicate transaction errors without manual typing. Formulating advanced operational accounting metrics using Data Analysis Expressions (DAX): creating calculated columns, rolling averages, Year-over-Year (YoY) revenue variances, and margin growth percentage counters. Structuring high-impact canvas containers: cash flow waterfall blocks, line trend distributions, correlation scatter charts, and primary corporate KPI display cards. Configuring interactive parameter switchboards and visual slicers to build user-friendly report layouts.

Description

Project: Corporate Interactive Performance Intelligence Board. Working with a multi-file database of raw monthly retail operations and warehouse distribution records, students use Power Query to clean and link the disjointed tables. They write basic DAX financial metrics to build a multi-page interactive executive dashboard evaluating branch efficiency and monthly revenue growth against company margins.

U3: Financial Statement Analysis & Modelling

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Structural rules of connected corporate data modeling. Building seamless calculations that link the core three financial statements together: Income Statement, Balance Sheet, and Statement of Cash Flows. Accounting logic translation: tracking changes in working capital accounts, modeling asset depreciation schedules, and structuring equity/debt balances. Utilizing conversational AI data tools to draft forecasting assumptions, define key growth drivers, and map long-term operational lines. Establishing dynamic statement links. Integrating text summarizers to generate quick margin-safety reports on historical data records. Financial statement scenario analysis and sensitivity analysis.

Description

Project: Integrated Multi-Year Corporate Projection Model. Students take their clean historical corporate spreadsheet from Unit 1 and construct a fully linked multi-year forecasting extension. Utilizing AI assistance to trace metric behaviors, they build a model where changing an operational driver cell (such as inventory turnover or sales growth) causes all three statements to recalculate across the forecast horizon while remaining perfectly balanced.

U4: Corporate Finance & Valuation Modelling

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Time value of money concepts. Leverage measures and cost of capital. The long-term financing decisions. Discounted Cash Flow (DCF) valuation. Engineering analytical systems to evaluate long-term corporate investments, project cash allocations, and funding targets. Formulating multi-stage project cash flows. Advanced project evaluation metrics modeling: Net Present Value (NPV), Internal Rate of Return (IRR), and discounted payback durations. Leveraging AI data interpreters to analyze raw industry sector benchmarks and calculate the dynamic Weighted Average Cost of Capital (WACC). Engineering multi-variable base, best, and worst-case scenario matrices. Using built-in Excel tools (Data Tables, Scenario Manager) alongside conversational AI scripting prompts to design automated model controllers using CHOOSE and OFFSET arrays.

Description

Project: Capital Allocation Strategy & Cost Sensitivity Matrix. Students build a capital project model evaluating an enterprise franchise expansion plan. Deployed entirely without coding, students integrate dynamic scenario switchboards and multi-variable Data Tables that allow company executives to instantly view the project's adjusted NPV and IRR whenever cost variables, tax structures, or inflation rates shift.

U5: Forecasting & Applied Financial Modelling

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Budgeting and forecasts models - revenue and cost forecasting, working capital forecasts. Key value driver and assumptions. Base, best and worst cases scenario analysis. Introduction to the concepts of investment and project finance modelling- project evaluation phases, cash flows patterns, decision making frameworks. Risk analysis and sensitivity test. Integrated financial models and presentation sheets preparation. LBO, and M&A models.

Description

Project: The Capstone Project: Integrated Enterprise Advisory Portfolio. Students form collaborative analytics squads to analyze a real enterprise experiencing a strategic expansion. Teams integrate their multi-year projection models with a live-published Power BI dashboard layout. The course culminates in a boardroom simulation presentation where squads defend their visual indicators, data transformation models, and strategic conclusions under questioning from an expert panel.

Essential Reading

1.Day,A.(2013).Mastering financial modelling in Microsoft Excel (3rd ed.).Pearson.

2.Sengupta,C.(2009).Financial analysis and modeling using Excel and VBA (2nd ed.).Wiley.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL MODELING

COURSE CODE: COM401F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

5 CIA components should take place. The total should be divided into 50 marks each.

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE - 100 Marks

COURSE NAME: ALGORITHMIC TRADING AND QUANTITATIVE FINANCE

COURSE CODE: COM401F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the principles and architecture of algorithmic trading systems and quantitative finance models.

CO2: Apply Python tools to analyze, process, and visualize financial market data.

CO3: Develop and backtest algorithmic trading strategies using Python

CO4: Evaluate trading performance using risk-adjusted return measures and optimization techniques.

CO5: Design a complete algorithmic trading project integrating strategy logic, coding, and performance reporting.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Peace, justice and strong institutions

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Algorithmic Trading and Quantitative Finance

Teaching Hours: (10)

Development Needs:

National

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U1-T1. Overview of algorithmic trading and quantitative finance - Market microstructure, order types, and trade execution - Components of an algorithmic trading system - Python environment setup for financial analytics - Importing and managing financial data using APIs (Yahoo Finance, Alpha Vantage) Project: Import stock price data from an API, compute returns and volatility, and visualize price trends.

U2: Financial Data Analysis and Time Series Modeling using Python

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U2-T1. Financial time series concepts: returns, autocorrelation, volatility clustering - Stationarity and ARIMA models - Technical indicators: moving averages, RSI, MACD - Statistical and ML/ DL-based forecasting of prices - Data preprocessing for model building. Python Libraries needed: statsmodels, scikit-learn, pandas, matplotlib Project: Build and evaluate an ARIMA-based short-term stock price predictor using python

U3: Strategy Design and Backtesting Framework

Teaching Hours: (12)

Development Needs:

Regional

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Sustainability

U3-T1. Basics of trading strategies: mean reversion, momentum, and pairs trading - Portfolio construction and optimization - Backtesting concepts: data-snooping bias, look-ahead bias - Building backtesting systems in Python - Evaluating trading performance metrics (Sharpe ratio, Sortino ratio, Max drawdown) Python Libraries: numpy, pandas, matplotlib, backtrader, pyfolio Project: Implement and backtest a momentum-based trading strategy using historical price data.

U4: Machine Learning and AI in Algorithmic Trading

Teaching Hours: (12)

Development Needs:

National

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment

U4-T1. Overview of ML techniques in finance (classification, regression, clustering) - Feature engineering and selection for financial datasets - Model evaluation and cross-validation - Reinforcement learning for trading (introductory concepts) - Risk management and position sizing Python Libraries: scikit-learn, tensorflow (optional), xgboost Project: Develop an ML-based trading signal model using historical financial indicators.

U5: Integrated Trading Systems and Capstone Project

Teaching Hours: (14)

Development Needs:

National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Integrated Trading Systems and Capstone Project

Description

Integrating data analysis, strategy logic, and execution simulation - Real-time trading simulation using Python APIs - Portfolio optimization and risk-adjusted performance measurement - Visualization and reporting dashboards using Python - Ethical, regulatory, and practical considerations in algorithmic trading

Capstone Project Options:

5. Design and backtest a multi-factor trading strategy (momentum + volatility).
5. Develop an AI-based trading bot using ML classifiers for buy/sell signals.
5. Build a portfolio optimization model integrating Sharpe ratio and risk metrics.

Essential Reading

1. Tucker Balch, M. (2020). Machine learning for algorithmic trading. Packt Publishing.
1. Lopez de Prado, M. (2018). Advances in financial machine learning. Wiley.
1. Jansen, R. (2021). Hands-on financial modeling with Python. Packt Publishing.

EXAMINATION PATTERN

COURSE NAME: ALGORITHMIC TRADING AND QUANTITATIVE FINANCE

COURSE CODE: COM401F-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I (20 marks)+ CIA II (50 marks)+ CIA III (20 Marks)

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE-100 marks

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Analyse organisational behaviour concepts, models, and interdisciplinary foundations to examine contemporary challenges such as diversity, sustainability, and green organisational behaviour.

CO2: Evaluate the influence of personality, values, attitudes, emotions, on individual behaviour, ethical conduct, employee well-being and sustainability outcomes in AI-driven work environments.

CO3: Analyse learning, perception, motivation and decision-making processes to assess behavioural change, ethical judgement, sustainability-oriented decisions, and the impact of artificial intelligence on managerial decision-making..

CO4: Analyse group dynamics, team processes, and collaborative mechanisms, including green teams and technology-enabled teams, to evaluate their effectiveness in achieving organisational and sustainability goals.

CO5: Evaluate the role of power, conflict, negotiation, resilience, leadership, organisational culture, and change in managing sustainability initiatives.

Sustainability Development Goals (SDG)

Decent work and economic growth, Gender equality, Good health and well-being, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Empathy and active listening, Leadership and social influence, Motivation and self-awareness, Quality control, Resilience flexibility and agility

Course Content

U1: Introduction to Organisational Behaviour

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. Introduction to Organisational Behaviour

Description

Meaning of Organisational Behaviour, Nature of Organisational Behaviour, Disciplines contributing to Organisational Behaviour, Challenges and opportunities for OB, Diversity in organisations, Biographical characteristics, Diversity management, Organisational Behaviour models, Green Organisational Behaviour (GOB), Sustainability and workplace behaviour, Environmental psychology in the workplace, Pro-environmental behaviour and psychological safety at work.

U2: Individual Behaviour

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Environment, Professional Ethics

U2-T1. Individual Behaviour

Description

Individual Behaviour - Factors Influencing Individual Behaviour, Personality – meaning, Type A and Type B personality, MBTI, Big Five Personality Model, Locus of Control, Core Self-Evaluation, Machiavellianism, Narcissism, Values and attitudes – importance of values, Terminal and Instrumental values, Whistle-blowing as an ethical issue in organisational behaviour, Values across cultures – Hofstede and GLOBE frameworks, Components of attitudes, Job-related attitudes, Job involvement, Job satisfaction – causes and effects Emotions and moods – emotional labour, Emotional intelligence, OB applications of emotions and moods, Stress management – work-related stress, Stress and burnout, Management of stress, Technostress and AI-driven work stress Motivation, theories of motivation - Need Hierarchy Theory, Theory X and Theory Y, Herzberg's Two-Factor Theory, McClelland's Theory of Needs.

U3: Learning, Perception and Individual Decision-Making

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Gender, Human Values, Professional Ethics

U3-T1. Learning, Perception and Individual Decision-Making

Description

Learning – definition and importance, Theories of learning - Stimulus-Response Theory, Cognitive Theory, Social Learning Theory, Principles of learning, Shaping as a managerial tool, Learning for green behaviour Perception – factors influencing perception, Attribution theory, Common shortcuts in judging people, Link between perception and individual decision-making. Decision-making in organisations, Ethics in decision-making, Artificial intelligence in managerial decision-making, and Data-driven decision-making.

U4: Foundations in Group Behaviour and Team

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U4-T1. Group Behaviour and Team Dynamics

Description

Defining and classifying groups, Tuckman's model of group development, Factors influencing group behaviour, Group properties – roles, norms, status, size, cohesiveness, Group decision- making – groupthink, group shift, Techniques in group decision-making, Transactional Analysis, Johari Window, Types of teams - green teams, virtual teams, cross-functional sustainability teams. Creating effective teams - Teams and collaborations - Technology-enabled collaboration.

U5: Power, Conflict and Negotiation – Dynamics of Organisational Behaviour

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics, Sustainability

U5-T1. Dynamics of Organisational Behaviour - Power, Conflict and Negotiation

Description

Leadership - shared leadership, transformational leadership, authentic leadership, Ethical and responsible leadership, Leadership for sustainability Power – meaning and sources, Power and politics in organisations, Conflict – process, sources and outcomes, Conflict management, Negotiation process, Negotiation strategies, Global implications of negotiation Organisational culture – definition and functions, Creating and sustaining culture, Organisational culture and climate, Creating a culture for sustainability and innovation, Green organisational culture, Spirituality and organisational culture. Organisational change – meaning, forces for change, Resistance to change – overcoming resistance to change, Approaches to managing organisational change, Behavioural change for sustainability.

Essential Reading

1. Robbins, S. P., & Judge, T. A. (2022). Organizational Behavior (19th ed.). Pearson Education.
1. Luthans, F., Doh, J. P., & Luthans, B. C. (2021). Organizational Behavior: An Evidence-Based Approach (14th ed.). Information Age Publishing.
1. McShane, S. L., & Von Glinow, M. A. (2021). Organizational Behavior: Emerging Knowledge, Global Reality (9th ed.). McGraw-Hill Education.

EXAMINATION PATTERN

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid-semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: BUSINESS POLICY AND STRATEGIC MANAGEMENT

COURSE CODE: COM402-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the fundamental concepts, evolution, and scope of business policy and strategic management, and articulate the role of strategic intent and governance in modern organizations.

CO2: Analyze the external and internal business environment using strategic tools such as PESTEL, Porter's Five Forces, value chain, RBV, and SWOT to identify strategic issues and opportunities.

CO3: Formulate appropriate business-level, corporate-level, and global strategies—including innovative and sustainable options—based on organizational capabilities and environmental conditions

CO4: Apply strategic models to implement strategies effectively through appropriate structures, leadership, culture, resource allocation, and ethical practices, addressing challenges in strategic change.

CO5: Evaluate organizational strategies using strategic control systems, KPIs, the Balanced Scorecard, and sustainability/ESG metrics to enhance performance and long-term value creation.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Empathy and active listening, Leadership and social influence, Motivation and self-awareness, Quality control, Resilience flexibility and agility

Course Content

U1: Introduction to Business Policy and Strategic Management

Teaching Hours: (12)

Development Needs:

Global, Local, National

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U1-T1. Introduction to Business Policy and Strategic Management

Description

Definition, nature and scope of Business Policy; Evolution of Strategic Management as a field; Concepts of Strategy and Strategic Management; Levels of strategy — corporate, business, and functional; Strategic intent — vision, mission, goals, and objectives; Strategic fit and strategic flexibility; The role of

strategic management in sustainability and corporate governance.

U2: Environmental and Internal Analysis

Teaching Hours: (12)

Development Needs:

Global, Local, National

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U2-T1. Environmental and Internal Analysis

Description

Environmental scanning: PESTEL, Porter's Five Forces Model; Industry life cycle analysis; Competitor analysis and benchmarking; Internal environment: resource-based view (RBV), value chain analysis, core competencies, VRIO framework; SWOT analysis and strategic gap analysis.

U3: Strategy Formulation

Teaching Hours: (14)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Professional Ethics, Sustainability

U3-T1. Strategy Formulation

Description

Business-level strategies: Cost leadership, differentiation, and focus; Corporate-level strategies: growth, stability, retrenchment, diversification, mergers and acquisitions, strategic alliances, joint ventures, international strategies; Blue Ocean strategy; Global strategic options in the digital era. Integrating core strategic management themes, environmental analysis, competitive advantage, corporate & business-level strategy, and governance with AI-enabled strategic intelligence, scenario planning, decision support systems, & platform strategies.

U4: Strategy Implementation

Teaching Hours: (10)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U4-T1. Strategy Implementation

Description

Organizational structure and strategy; Resource allocation; Leadership and culture in strategy

implementation; Managing strategic change and innovation; Business ethics and corporate social responsibility in strategy execution; Managing resistance and building commitment.

U5: Strategy Evaluation and Control

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U5-T1. Strategy Evaluation and Control

Description

Nature, importance, and process of strategy evaluation; Strategic control systems; Balanced Scorecard and Key Performance Indicators (KPIs); Measuring strategic effectiveness and organizational performance; Strategic audit; Contemporary issues — digital disruption, sustainability strategy, ESG integration. Embedding green perspectives through sustainability-driven strategy, climate risk assessment, circular & regenerative models, ESG integration, and long-term value creation would help learners engage with strategy as a tool for resilience.

Essential Reading

1. Wheelen, T. L., Hunger, J. D., Hoffman, A. N., & Bamford, C. E. (2023). Strategic Management and Business Policy: Globalization, Innovation, and Sustainability (17th ed.). Pearson Education. Hill, C. W. L., Schilling, M. A., & Jones, G. R. (2023). Strategic Management: Theory and Cases — An Integrated Approach (14th ed.). Cengage Learning. Grant, R. M. (2021). Contemporary Strategy Analysis: Text and Cases Edition (11th ed.). Wiley.

EXAMINATION PATTERN

COURSE NAME: BUSINESS POLICY AND STRATEGIC MANAGEMENT

COURSE CODE: COM402-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | $3 \times 5 = 15$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | $2 \times 10 = 20$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | $7 \times 5 = 35$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: INTERNATIONAL FINANCE AND GLOBAL MARKETS

COURSE CODE: COM402F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Analyze the international financial environment, including the monetary system, the Balance of Payments, and global capital markets like those for Masala Bonds and ADRs/GDRs.

CO2: Evaluate the theories of exchange rate determination like PPP and IRP and apply forecasting techniques to understand currency movements.

CO3: Analyze, measure, and differentiate between the various types of foreign exchange exposures—transaction, translation, and economic—while also assessing political risk.

CO4: Develop and apply appropriate risk management strategies using both internal techniques like netting and external derivative instruments like forwards, options, and swaps.

CO5: Assess multinational capital budgeting decisions like FDI and critically examine the impact of emerging trends, including FinTech, CBDCs, and Sustainable Finance on global markets.

Sustainability Development Goals (SDG)

Affordable and clean energy, Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, No poverty, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Resilience flexibility and agility

Course Content

U1: The International Financial Environment

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. International vs. Domestic Finance. Globalization and the Multinational Corporation (MNC). The Balance of Payments (BOP) framework and its interpretation. International Monetary System: A critical review of the evolution from the Gold Standard to the Bretton Woods system and the current managed-float regime. Parity Conditions: A deep dive into PPP, IRP, and the International Fisher Effect (IFE). Introduction to Parity Anomalies: A conceptual look at failure of these theories.

U2: Foreign Exchange (Forex) Market and Forecasting

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Market Mechanics: Structure of the global forex market (spot, forward, futures, swaps). Key participants and the role of arbitrage (locational, triangular, covered interest). **Exchange Rate Determination:** Factors influencing exchange rates (economic fundamentals, central bank intervention, market sentiment). **Introduction to Forex Forecasting:** Market-Based Forecasts (using forward rates). **Fundamental Forecasting** (using economic models like PPP). **Technical Analysis.** UCITS tools.

U3: International Financial Markets and Institutions

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Global Capital Markets: Eurocurrency markets (Eurodollars), International Bond Markets (Eurobonds, Foreign Bonds). **Indian Context:** Offshore Rupee Instruments, specifically Masala Bonds, and the framework for External Commercial Borrowings (ECB). **International Equity Markets:** Raising capital globally: Cross-listing and strategic rationale. **Depository Receipts (DRs):** ADRs/GDRs and IDRs.

U3-T2. India's Integration with Global Markets: The role and impact of Foreign Portfolio Investors (FPIs) on Indian capital markets. **Introduction to India's Capital Account Convertibility (CAC)** and its current status. **International Institutions:** Role and impact of the IMF, World Bank, WTO and Bank for International Settlements (BIS), relationship with India. **International Asset Pricing:** Introduction to the International CAPM, benefits of global diversification, and the 'home bias' puzzle.

U4: Foreign Exchange Risk and Exposure

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U4-T1. Defining and Measuring Exposure: Transaction Exposure: Risk from contractual foreign currency payables/receivables. **Translation (Accounting) Exposure:** Risk in consolidating foreign-subsidary financials. **Economic (Operating) Exposure:** Long-term risk to the firm's competitive position. **Political and Country Risk:** Assessing and managing risks like expropriation, currency inconvertibility, and regulatory changes.

U5: Hedging Strategies and Derivatives

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Internal Hedging Techniques: Leading and lagging, multilateral netting, and price invoicing. **External Hedging Instruments (Application):** Managing risk with Forwards and Futures contracts. **Money Market Hedging.** Hedging with Options (Puts and Calls): Strategies and cost-benefit analysis. **Introduction to Swaps (Currency and Interest Rate).** **Managing Economic and Translation Exposure:** Strategic, operational, and financial hedges. **U6: Multinational Investment and Emerging Trends**

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U6-T1. Foreign Direct Investment (FDI): Motives, strategic considerations, and political risk assessment. **International Capital Budgeting:** Process of evaluating foreign projects. Adjusting cash flows vs. discount rates for country risk. **Introduction to the Adjusted Present Value (APV).** **Emerging Trends in Global Finance:** Impact of Blockchain on trade finance, supply chain management, and cross-border payments. **Central Bank Digital Currencies (CBDCs):** payment efficiency, financial inclusion.

U6-T2. Models (Wholesale vs. Retail CBDCs). CBDCs and the International System: Implications for cross-border payments, correspondent banking, and the potential impact on systems like SWIFT. **The Move to a Global Cashless Economy:** Drivers: Mobile payments, FinTech innovation, and policy pushes. Impact on global e-commerce, international remittances, and financial transparency. **Regulatory and security challenges in a digital-first financial world.** **Sustainable Finance:** ESG, green and blue bond markets.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL ECONOMETRICS

COURSE CODE: COM402F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the concepts and assumptions underlying financial econometric models.

CO2: Examine regression and time-series techniques to financial data.

CO3: Appraise relationships among financial variables using econometric tools.

CO4: Critique model performance and statistical inference outcomes.

CO5: Create and interpret forecasting models for financial series.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Quality control, Technological literacy

Course Content

U1: Introduction to Financial Econometrics

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Nature and characteristics of financial data - Review of probability, statistics, and hypothesis testing - Classical linear regression model (CLRM): assumptions and violations - Econometric modelling process and diagnostic testing - Applications in financial data analysis.

U2: Time Series Data and Modelling

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Nature of data - Time series properties: stationarity, trend, and seasonality – Metrics / Tests for testing stationarity - Autocorrelation and partial autocorrelation functions - AR, MA, and ARMA models – ARIMA model - Model identification, estimation, and forecasting - Model selection criteria (AIC, BIC)

U3: Modelling Volatility and Financial Risk

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Volatility – measurement and forecasting volatility - Conditional heteroskedasticity in financial returns - ARCH, GARCH, TGARCH, and EGARCH models - Volatility clustering and leverage effects - Forecasting volatility and Value-at-Risk (VaR) - Practical applications to stock returns and exchange rate data – TVP VAR model and applications.

U4: Multivariate Models and Long-Run Relationships

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Long-Run Relationships in financial time series - Vector autoregression (VAR) and impulse response functions – variance decomposition analysis - Cointegration and error correction models (ECM) - Johansen cointegration test - Granger causality testing in finance – time series and panel causality tests - Applications to portfolio diversification and asset pricing

U5: Advanced Topics and Empirical Applications

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. High-frequency financial data analysis - Event study methodology - Forecast evaluation and model comparison - Machine learning approaches to econometric modelling (Introduction) – Capstone Project: Empirical study on financial market efficiency/volatility modelling/forecasting returns and volatility.

Essential Reading

1. Gujarati, D. N., Porter, D. C., & Gunasekar, S. (2017). Basic econometrics (5th ed.). McGraw-Hill Education.

1. Wooldridge, J. M. (2020). Introductory econometrics: A modern approach (7th ed.). Cengage Learning.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL ECONOMETRICS

COURSE CODE: COM402F-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I - 20 Marks, CIA II - 50 Marks, CIA III - 20 Marks

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | $7 \times 5 = 35$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COM403F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the concept, characteristics, and role of alternative investments in a portfolio.

CO2: Differentiate between traditional and alternative asset classes.

CO3: Analyze hedge funds, private equity, real estate, commodities, and structured products.

CO4: Evaluate risk-return profiles and performance measurement techniques of alternative investments.

CO5: Understand regulatory, ethical, and operational aspects associated with alternative assets and apply portfolio diversification strategies using alternative assets.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility, Technological literacy

Course Content

U1: The Alternative Investment Landscape & Portfolio Theory

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Definition and evolution of alternative investments, Differences between traditional and alternative assets, Liquid vs. Illiquid assets, Role in portfolio diversification, Market players and trends, Overview of major asset classes. , Private Credit Boom- (Direct Lending, Distressed Debt, Mezzanine Financing). The "Democratization" of alternatives (retail access). Portfolio Construction: The Yale Model (Endowment Model) vs. Traditional 60/40 portfolios.

U2: Hedge Funds

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Structure, strategies, and classifications (long/short, event-driven, global macro, arbitrage), Directional: Global Macro, Managed Futures. Event-Driven: Distressed Debt,

Merger Arbitrage, Relative Value: Long/Short Equity, Fixed Income Arbitrage. Risk-return characteristics, Hedge fund performance evaluation (Sharpe, Sortino, Information ratio), Fees and incentives (2 & 20 model), Regulatory and ethical issues. Case Study Discussion: The Collapse of Long-Term Capital Management (LTCM) - A lesson in leverage and correlation breakdown

Description

Case Study Discussion: The Collapse of Long-Term Capital Management(LTCM) - A lesson in leverage and correlation breakdown

U3: Private Equity and Venture Capital

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics, Sustainability

U3-T1. Structure of private equity funds, Stages of investment: venture capital, growth capital, buyouts, The PE Lifecycle: Fundraising, Deal Sourcing, Value Creation, and Exit. Valuation of private firms (DCF, multiples, comparables), Strategies: Venture Capital (Seed to Series C), Growth Equity, and Leveraged Buyouts (LBOs). Exit routes: IPO, M&A, secondary sale. Case studies: Blackstone, Sequoia Capital.

U4: Real Estate and Infrastructure Investments

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Background of Real Estate Funds in India, Commencement of REIT in India, Types: residential, commercial, REITs, infrastructure funds, Real estate valuation techniques, Risks and returns in property investment, Global and Indian REIT market trends, Performance of Indian REIT Case Discussion on Embassy REIT, IndiGrid, InvIT, Power Grid InvIT.

U5: Commodities and Derivatives & Structured Products and Other Alternatives

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Physical vs. derivative-based commodity investment, Types of Commodities traded in the market, Commodity indices and ETFs, Pricing dynamics and risk management, Role in inflation hedging and portfolio diversification, Activity: Live commodity market tracking and report, Overview of structured notes, CDOs, CLOs, MBS, Infrastructure funds, art funds, collectibles, and Digital Assets. Risk-return implications.

U6: Global and Indian regulatory framework (SEBI, AIF Regulations 2012)

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U6-T1. SEBI (Alternative Investment Funds) Regulations, 2012. Categories I, II, and III AIFs. Ethics in alternative investing, Due Diligence (DD): Investment DD vs. Operational DD (Checking the "back office" to prevent fraud).BRSR framework, ESG and sustainability in alternatives, Future of alternative assets (tokenization, AI, green infrastructure funds). Ethics & ESG: Greenwashing in impact funds; Ethical conflicts in short-selling and asset stripping. Essential Reading

- CAIA Level I: An Introduction to Core Topics in Alternative Investments – CAIA Association
- Alternative Investments: Instruments, Performance, Benchmarks, and Strategies by Donald R. Chambers et al.
- Private Equity: History, Governance, and Operations – Harry Cendrowski
- Hedge Funds: Quantitative Insights – François-Serge habitant

EXAMINATION PATTERN

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COM403F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

20 Marks CIA 1

50 Marks MSE

20 Marks CIA 3

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Question Paper Pattern for End Term Examination (ETE)

Written examination conducted for 3 hours duration: Sections Type Marks
A Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks $7 \times 5 = 35$
B Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks $5 \times 10 = 50$
C Case Study (Compulsory) $1 \times 15 = 15$

COURSE NAME: QUANTITATIVE RISK AND PORTFOLIO MANAGEMENT

COURSE CODE: COM403F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the principles of risk measurement and portfolio theory.

CO2: Apply quantitative models to measure and manage financial risks.

CO3: Construct optimized portfolios using modern risk-return frameworks.

CO4: Evaluate portfolio performance and stress-test models under uncertainty.

CO5: Integrate ethical and behavioral considerations in quantitative risk practice.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Quantitative Risk Management

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. Foundations of Quantitative Risk Management

Description

Overview of risk management frameworks; Types of financial risk (market, credit, liquidity, operational); Risk factors and measurement; Historical development of modern portfolio theory; Statistical foundations of risk – expectation, variance, covariance; Risk-adjusted performance metrics (Sharpe ratio, Treynor ratio).

U2: Quantitative Models of Risk

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U2-T1. Quantitative Models of Risk

Description

Value-at-Risk (VaR) and Expected Shortfall; Parametric and non-parametric estimation; Stress testing and scenario analysis; Credit risk models (CreditMetrics, KMV, structural and reduced form); Liquidity risk

modeling; Role of correlations and diversification in risk aggregation.

U3: Portfolio Construction and Optimization

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Portfolio Construction and Optimization

Description

Mean-variance optimization; Efficient frontier and capital market line; Risk budgeting and factor models; Active vs passive portfolio strategies; Black–Litterman model; Bayesian approaches to portfolio design; Applications in multi-asset and alternative investment portfolios

U4: Performance Evaluation and Risk Governance

Teaching Hours: (12)

Development Needs:

National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U4-T1. Performance Evaluation and Risk Governance

Description

Performance attribution; Benchmarking and risk-adjusted returns; Model validation and backtesting; Stress-testing under extreme market events; Enterprise risk management frameworks; Quantitative governance and model risk control; Case studies of global risk failures and reforms (e.g., LTCM, 2008 crisis).

U5: Ethics, Regulation, and Behavioral Aspects of Risk Management

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Human Values

U5-T1. Ethics, Regulation, and Behavioral Aspects of Risk Management

Description

Ethical principles in quantitative modeling; Risk culture and governance; Regulatory frameworks (Basel III/IV, SEBI, RBI); Behavioral biases in portfolio decisions; ESG integration in portfolio risk analysis; Capstone project – Quantitative risk and portfolio simulation using real data.

Essential Reading

EXAMINATION PATTERN

COURSE CODE: COM403F-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA 1 -20 Marks, CIA 2 -30 Marks, CIA 3 - 50 Marks

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Assessment

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

COURSE TYPE: Practical

TOTAL HRS: 8 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Identify and define a domain related research problem that requires data-driven analysis.

CO2: Apply financial, statistical, and computational tools to analyze real-world data.

CO3: Analyze relationships and patterns within financial datasets using appropriate models.

CO4: Evaluate the robustness and reliability of analytical outcomes.

CO5: Design and present a data-driven solution or model that addresses a financial problem

Sustainability Development Goals (SDG)

Industry, innovation and infrastructure, Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Project Submission Phases

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. Phases of Project: Phase 1: Orientation and Proposal Development Weeks 1–2 - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process Project proposal (Title, objectives, rationale, data source, methodology) Phase 2: Literature Review and Conceptual Framework Weeks 3–4 - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building conceptual and analytical framework Literature review report and research design Phase 3: Data Collection and Preparation Weeks 5–6 - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis. Cleaned dataset and exploratory data analysis report Phase 4: Model Building and Analysis Weeks 7–11 - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing

Description

Phase | Weeks | Focus Area | Expected Deliverables | Phase 1: Orientation and Proposal Development | Weeks 1–2 | - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process | Project proposal (Title, objectives, rationale, data source, methodology) | Phase 2: Literature Review and Conceptual Framework | Weeks 3–4 | - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building a conceptual and analytical framework | Literature review report and research design | Phase 3: Data Collection and Preparation | Weeks 5–6 | - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis | Cleaned dataset and exploratory data analysis report | Phase 4: Model Building and Analysis | Weeks 7–11 | - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing | Analytical model with output, interpretation, and visualizations | Phase 5: Report Writing and Presentation | Weeks 12–15 | - Structuring report (Abstract, Methodology, Results, Conclusion)- Final presentation and viva preparation | Final report, project presentation, and viva voce | Phase 6: Evaluation and Reflection | Week 16 | - Final evaluation by panel- Reflection on learning outcomes | Evaluation report and reflective summary |

U2: Suggested Project Themes

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U2-T1. ♦ Financial Markets & Investment Analytics • Predicting stock price movements using machine learning • Sentiment analysis of financial news and its impact on stock returns • Portfolio optimization using risk-return analytics • Volatility modeling using GARCH or ARIMA models ♦ Corporate Finance & Valuation • Startup valuation using financial ratios and cash flow models • Financial distress prediction using logistic regression or random forest • Cost of capital and capital structure optimization ♦ Banking & Risk Analytics • Credit risk modeling using historical default data • Loan default prediction using classification algorithms • Value-at-Risk (VaR) and Expected Shortfall computation for portfolios ♦ Macroeconomics & Policy Analysis • Exchange rate forecasting using time series models • Impact of macroeconomic indicators on stock market performance • Inflation forecasting using ARIMA or regression techniques

Description

Financial Reporting & ESG Analytics • ESG disclosure sentiment analysis using NLP

- Financial statement fraud detection using anomaly detection
- Earnings call transcript analysis and its impact on firm performance

EXAMINATION PATTERN

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Evaluation and Assessment Structure (100 Marks)

Component | Weightage | Evaluation Criteria | Project Proposal | 10% | Clarity of problem statement, feasibility, and research plan | Literature Review | 10% | Depth of review, conceptual framework | Data Preparation & Analysis | 20% | Data quality, methodology, and statistical rigor | Model Building & Findings | 25% | Accuracy, interpretation, and innovation | Final Report | 20% | Structure, clarity, referencing, and conclusions | Presentation & Viva | 15% | Communication, defense, and analytical insights |

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

COURSE TYPE: Practical

TOTAL HRS: 30 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Apply theoretical knowledge to real-world business environments

CO2: Demonstrate professional skills and workplace competencies

CO3: Critically analyse business operations and organizational practices

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals 21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Empathy and active listening, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to the Organization

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. 1.1 Profile of the organization (including evolution, awards and recognition) 1.2

Vision, Mission, Goals

U2: Organizational Design and Functional Areas

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U2-T1. 2.1 Organization design & structure 2.2 Departments and Divisions 2.3 Product/s and Service/s 2.4 Business Model

Description

- Hierarchical/flat/matrix structure (include organogram if possible) • Overview of key functional

departments • Major offerings, features, target market • Revenue generation , customer acquisition, delivery mechanism

U3: Key Performance Areas (KPA)s, Organizational Control and Strategies

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. 3.1 KPA's of the various departments 3.2 Accounting Standards & Reporting followed 3.3 HR Practices 3.4 Financial Highlights 3.5 Modes of Marketing 3.6 Integration of AI 3.7 Tax Filing & Auditing 3.8 SWOC Analysis of the Organization (Based on the intern's observation and analysis supported by facts)

Description

KPAs across various departments (Sales, HR, Finance, etc.) • IND AS, internal reporting systems, compliance frameworks • Recruitment, appraisal, training, and retention strategies • Key financials (Turnover, Profit, Investments – if available) • Digital, traditional, B2B/B2C approaches, branding • Use of AI, automation tools, ERP systems, CRM tools • Tax practices, statutory audit process, internal audits • Strengths, Weaknesses, Opportunities, Challenges • Factors driving organisational growth and sustainability • Intern's strategic operational recommendations

U4: Course Learning Outcomes and Conclusion

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics, Sustainability

U4-T1. 4.1 Applications of Theoretical Knowledge to Real-World Business Environments 4.1.1 Relevance of Academic Theories (Accounting, Finance, HR, etc.) 4.1.2 Gaps or Irrelevance Identified 4.2 Professional Skills and Workplace Competencies 4.2.1 New Skills Acquired During Internship 4.2.2 Existing Skills Nurtured or Strengthened 4.2.3 Skills/Competencies Identified for Further Development 4.2.4 Input from Key Personnel

Description

4.3 Critical Analysis of Business Operations and Practices

4.3.1 Good Business Practices Observed

4.3.2 Practices Worth Replicating at CHRIST University

Conclusion

Summary of internship experience

Key takeaways and reflections

Impact of internship on career readiness

EXAMINATION PATTERN

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Assessment (Marks Distribution) Weekly Report Submission - 40 Marks Industry Mentor's Evaluation - 20 Marks Internship Mentor's Evaluation - 40 Marks Internship Report Evaluation - 50 Marks Viva Voce Examination - 50 Marks Total - 200 Marks

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, necessity, and defining characteristics of quantitative research, and distinguish it from qualitative research

CO2: Design a basic survey framework by identifying suitable sampling methods, data collection modes, and approaches to minimize non-response bias.

CO3: Develop valid and reliable survey instruments through appropriate question design, scaling, and pretesting techniques.

CO4: Evaluate experimental designs and identify strategies to ensure validity, control variables, and derive causal inferences in business research.

CO5: Perform and interpret statistical analyses ethically, integrating quantitative findings into evidence-based business decision-making.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Motivation and self-awareness, Technological literacy

Course Content

U1: Foundations of Quantitative Research

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Quantitative Research -. Nature, Necessity, and Importance - Relevance and Urgency in the Data-Driven Era (ADHOGS & DVUCA) - Defining Characteristics: Scope, Objectivity, Goal, Data, and Method - Quantitative vs. Qualitative Research - Strengths and Shortcomings

U2: Introduction to Survey Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Survey Research – Meaning and Purpose – When and Why Surveys Are Used – Types of Surveys (Cross-Sectional, Longitudinal) – Sampling in Survey Research (Sampling Frame, Probability & Non-probability Methods) – Non-response and Bias Reduction – Modes of Survey Data Collection (Mail, Telephone, Online, Face-to-Face) – Implementation and Ethical Considerations

U3: Advanced Considerations in Survey Research

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Designing Good Measures – Question Design and Wording – Scales and Response Formats – Reliability and Validity of Instruments – Pre-testing and Pilot Studies – Survey Implementation and Interviewer Training – Data Preparation (Coding, Cleaning, Data Entry) – Ethical and Error Perspectives (Total Survey Error, Bias Control)

U4: Experimental Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Experimental Research – Concept and Purpose – Independent and Dependent Variables – Randomization and Control – True, Quasi-, and Field Experiments – Internal and External Validity – Threats to Validity and Control Techniques – Practical Applications in Commerce and Management Contexts – Ethical Issues in Experimental Studies

U5: Data Analysis in Quantitative Research

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Data Preparation – Handling Missing Data and Outliers – Testing Assumptions (Normality, Linearity, Multicollinearity) – Descriptive and Inferential Statistics (Mean, SD, t-test, ANOVA, Correlation, Regression) – Multivariate Analysis (Factor Analysis, CB-SEM, PLS-SEM) – Hypothesis Testing and Error Types (I–IV) – Effect Size and Statistical Power – Interpreting and Reporting Results – Ensuring Reproducibility and Ethical Reporting
Essential Reading

1. Fowler, F. J. (2025). Survey research methods (Reprint 5th ed.). SAGE Publications.
1. Campbell, D. T., & Stanley, J. C. (2025). Experimental and quasi-experimental designs for research. Ravenio Books.
1. Field, A. (2025). Discovering statistics using IBM SPSS statistics (5th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA -III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35

Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, design process, and ethical considerations of qualitative research.

CO2: Distinguish among the five qualitative research approaches and identify suitable designs for business contexts.

CO3: Develop qualitative research problems, purpose statements, and research questions aligned with study objectives.

CO4: Apply appropriate methods for qualitative data collection, coding, and thematic analysis using software tools.

CO5: Write and evaluate qualitative research reports incorporating reflexivity, validation, and ethical standards.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills
Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Technological literacy

Course Content

U1: Designing a Qualitative Study

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Qualitative Research – Meaning - Characteristics and purpose of qualitative research - When to use qualitative research - Ethical considerations and preliminary design issues - Steps in the qualitative research process - Components of a qualitative research proposal.

U2: Five Qualitative Approaches to Inquiry

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development
Cross Cutting Issues:
Professional Ethics

U2-T1. Overview of five approaches – Narrative, Phenomenological, Grounded Theory, Ethnographic, and Case Study – Definition, features, and procedures of each approach – Application in business and management research – Challenges in each approach – Comparison of approaches.

U3: Introducing and Focusing the Study

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Formulating the research problem – Developing purpose and research questions – The central question and sub-questions – Aligning research questions with the chosen qualitative approach – Writing qualitative purpose statements and research questions.

U4: Data Collection, Analysis and Representation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Data Collection: Meaning and process of data collection in qualitative studies – The data collection circle – Selection of sites and participants – Purposeful sampling strategy – Forms of data: interviews, observations, documents, audiovisual materials – Field issues and ethical considerations.

U4-T2. Data Analysis and Representation: Organising, coding, and categorising qualitative data – Data analysis spiral – Thematic analysis – Representing and visualising data – Introduction to qualitative software (NVivo, Atlas.ti, MAXQDA).

U5: Writing, Validation and Evaluation in Qualitative Research

Teaching Hours: (8)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Writing qualitative research reports – Structure and style – Reflexivity and representation – Validation and reliability in qualitative research – Strategies for trustworthiness – Evaluation standards for qualitative studies.

Essential Reading

Creswell, J. W., & Poth, C. N. (2025). Qualitative Inquiry and Research Design: Choosing Among Five Approaches (4th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA - III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35 Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

COURSE TYPE: Practical

TOTAL HRS: 360 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Demonstrate the ability to plan and execute a research project within defined time constraints and available resources.

CO2: Perform a substantial review of literature relevant to the chosen research topic to justify the significance of the study.

CO3: Demonstrate mastery of quantitative or qualitative research skills applicable to commerce and management contexts.

CO4: Demonstrate a clear knowledge and understanding of ethical standards in data collection, reporting, and academic integrity

CO5: Demonstrate effective communication of complex business concepts through both a written document and an oral presentation

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking, Creative thinking, Dependability and attention to detail, Technological literacy

Course Content

U1: Dissertation Proposal

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Before beginning the full dissertation, candidates must submit a proposal that proves the research is novel, significant, and feasible.

Description

Content and Structure• Specific Aims: Concisely state research goals, hypotheses (if applicable), and the expected impact on management practices or commerce theory.

Research Strategy:• Significance: Explain the critical barrier in commerce/management the project addresses and how it improves existing professional knowledge.

- Innovation: Describe any novel theoretical frameworks, methodologies, or applications that challenge current business paradigms.
- Approach: Detail the methodology (e.g., quantitative, qualitative, or mixed methods) and data analysis plans.
- Timeline and Milestones (1 page): A outline of benchmarks, from data collection to the final defense.
- Preliminary Studies: Discuss any initial data or pilot studies conducted to establish the feasibility of the project.

U2: Dissertation Structure

Teaching Hours: (295)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Dissertation is divided into three parts - Preliminary Pages, Main Body and End Matter

Description

PRELIMINARY PAGES

1. Title Page - Title of the Dissertation, Student Name & Register Number, Programme: BCom (Honours) with Research, Department / Institution Name, Supervisor Name & Designation, Academic Year 2. Declaration by the Student - Certificate from the Supervisor, Acknowledgements (Optional but recommended) 3. Abstract - 200–300 words, Background, Objectives, Methodology, Key findings, Keywords (4–6) 4. Table of Contents 5. List of Tables 6. List of Figures (if applicable) 7. List of Abbreviations (if applicable)

B. MAIN BODY OF THE DISSERTATION

Chapter I – Introduction - Background of the Study, Conceptual / Theoretical Context, Statement of the Problem, Need and Significance of the Study, Objectives of the Study, Research Questions , Scope of the Study, Limitations of the Study, Chapterisation Scheme

Chapter II – Review of Literature and Hypotheses Development - Introduction, Review of International Studies, Review of National Studies, Research Gap Identification, Conceptual Framework / Research Model (if applicable), Hypothesis Development Chapter - 3 Research Methodology

Chapter - 4 Data Analysis and Interpretation

Chapter V – Findings, Suggestions and Conclusion

END MATTER

References and Appendices

U3: Other Guidelines

Teaching Hours: (5)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Font Style: Times New Roman Font Size (Preliminary Pages): 14 point (e.g., Title Page, Abstract, Table of Contents). Font Size (Main Body): 12 point. Line Spacing: 1.5 spacing throughout (No double spacing). Margins: One inch on all sides. APA 7th edition guidelines to be followed. Final Viva Voce Examination. Students are encouraged to present their work in the conferences. They are also encouraged to convert their research into Scopus, WoS, or ABDC publications.

EXAMINATION PATTERN

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA Overall = 300
