Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Human Values

U2-T1. International Business Ecosystem

Description

International Business Environment- Definition-Importance- Scope of International Business Environment- Micro and Macro Environment -Strategic Management- Meaning, Analyzing the External Environment (SWOT Analysis, PESTLE Analysis, ETOP Framework); Analyzing the Immediate Competitive Environment (Life Cycle, Boston Box Matrix, and Ansoff Growth Matrix); Analysing the Wider Competitive Environment (Porter's Five Forces Model), Environmental compliance and Sustainable management practices

U3: Unit 3: Theories of International Trade and FDI

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Professional Ethics

U3-T1. Theories of International Trade and FDI

Description

Theory of mercantilism, Absolute advantage theory, Comparative advantage theory, Factor Endowment theory, Product life cycle theory, New trade theory, Leontief Paradox, Gravity model of trade; FDI: Meaning and types; Modes of entering Global Business – Exporting, Licensing, Franchising, Contract manufacturing, Mergers and Acquisitions, Joint ventures.

U4: Unit 4: International Trading Environment

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Human Values, Sustainability

U4-T1. International Trading Environment

Description

Trade policy instruments: Tariffs, Quotas, Voluntary Export Restraints, Export incentives and subsidies; Trade Agreements – Regional Trade agreements (SAARC, ASEAN, USMCA, BRICS), - Bilateral trade agreements and India's participation (India-UAE CEPA, India-Australia ECTA); Balance of trade and Balance of payments; India's Foreign Trade Policy 2025; Trade laws & regulations - Intellectual property rights, Export/import regulations; International digital trade, Sustainable international trade

U5: Unit 5: Global Production and Supply chain

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment, Sustainability

U5-T1. Global Production and Supply chain

Description

Importance of global production - value chain and global value chain; Factors influencing location of production facility; Decisions in a multinational context (Make or Buy, Standardization vs. adaptation); Supply chain management - Global vs. domestic supply chains; Production strategies: Centralized, Decentralized, Outsourcing, Offshoring; Lean production and Just-in-Time (JIT) systems - Managing quality standards across global operations (ISO, TQM, Six Sigma); Green Supply Chain Management (GSCM); Role of intermediaries and global logistics partners (3PL, 4PL service providers); Logistics technology (tracking, automation); Supply Chain Risk & Resilience

Essential Reading

Peng, M. W., & Srivastava, D. K. (2020). Global business (5th ed.). Cengage Learning India. Cherunilam, F. (2021). International trade and export management (20th ed.). Himalaya Publishing House

EXAMINATION PATTERN

COURSE NAME: GLOBAL BUSINESS OPERATIONS

COURSE CODE: COH401-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: GLOBAL FINANCIAL SYSTEMS

COURSE CODE: COH401F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the structure and evolution of the international financial system and its institutional framework.

CO2: Analyze the functioning of foreign exchange markets and the determination of exchange rates under different regimes.

Each question carries five marks | $7 \times 5 = 35$ | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | $5 \times 10 = 50$ | C | Case Study (Compulsory) | $1 \times 15 = 15$ |

COURSE NAME: INTEGRATED MARKETING COMMUNICATION

COURSE CODE: COH401M-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the IMC framework and distinguish it from traditional, siloed promotional planning.

CO2: Design a communication strategy that translates brand positioning and brand values into coherent messages across channels

CO3: Apply knowledge of creative strategy, digital media, PR, sales promotion, and experiential marketing to campaign planning

CO4: Construct, present, and build contingency into a complete IMC campaign plan.

CO5: Evaluate IMC campaigns against ethical standards, responsible AI use, ASCI guidelines, and sustainability principles.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Gender equality

21st Century Skills

Analytical thinking, Creative thinking, Empathy and active listening, Leadership and social influence

Course Content

U1: The IMC Framework and Consumer - Centric Strategy

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. Level of Knowledge: Basic and Conceptual IMC Foundations: Promotional mix to IMC; the IMC philosophy - one voice, one brand, multiple touchpoints; Don Schultz's IMC framework ; zero-based communication planning; Kotler's customer-centric definition of IMC; Touchpoint Strategy: Consumer contact points; mapping brand touchpoints across the customer journey; brand contact audit; share of voice vs share of mind; inside-out vs outside-in planning; Consumer Behaviour & Communication Psychology: Emotional branding; consumer decision-making process; trust building; audience research and insight; difference between data and insight; psychographic and behavioural profiling; From Positioning to Platform: Translating brand positioning into a communication platform; single-minded proposition (SMP); setting IMC objectives; the IMC planning cycle as a continuous process. Practical: Conduct a brand touchpoint audit for a chosen brand and map its customer journey.

U2: Advertising Strategy and Creative Direction

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U2-T1. Level of Knowledge: Conceptual and Applied Advertising as a Strategic Tool: Role of advertising in IMC; Advertising creative process - from brief to concept; the creative brief - purpose and components; the big idea; The Creative Anchor: Brand values - sustainability, social stance, freedom of expression, child-friendliness; the creative anchor as a fixed reference point above any single campaign; checking every campaign against the anchor before finalising messaging; Craft of Communication: Copywriting principles - headline, body copy, call to action; visual communication - layout, colour, imagery as strategic choices; brand tone of voice; storytelling - emotional vs rational appeals; Campaign & Budget Logic: Campaign thinking vs single ad; multiple executions under one campaign idea; advertising budget strategy - objective-and-task method; evaluating advertising effectiveness; Ethics in Advertising: ASCI self-regulation; stereotyping; exaggeration; responsibility of the communicator

U3: Digital Communication Strategy in the IMC Mix

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U3-T1. Level of Knowledge: Conceptual and Applied Owned, Earned, Paid Framework: The owned-earned-paid media model; industry and brand-type lens; Perception of each medium by category and positioning; beyond ROAS - perceived value; User Generated Content (UGC): UGC as intersection of media framework; credibility and authenticity of UGC; UGC vs branded content; designing for UGC. Community & Retention: Brand community for retention marketing; community as a long-term communication asset; Content & Direct Communication: Content strategy as an IMC discipline; the content brief; content calendar aligned to objectives; direct communication - email, SMS, WhatsApp as relationship tools; CRM as personalisation enabler; Data, Privacy & Martech: Consumer data and the ethics of personalisation; data protection landscape (India); martech for the strategist - automation, programmatic, AI-assisted content in strategic terms; digital metrics - campaign level vs channel level. Practical: Map POEM and UGC plan

U4: Below-the-Line Tools - Sales Promotion, PR & Experiential Marketing

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U4-T1. Sales Promotion: Consumer vs trade promotions; discounts, contests, sampling, loyalty programmes, bundling; promotional objectives; risk of over-reliance; integrating promotions with advertising; Shareability & Virality: Designing promotions with shareability built in from the start; peer amplification - friends, family, creators; word-of-mouth as a designed outcome, not an afterthought; Public Relations: PR as earned communication; press release; media relations; how journalists think; CSR as authentic vs performative communication; Brand Values as Crisis Foundation: Crisis communication -

first 24 hours, holding statements, reputation recovery; prior consistent communication of brand values as the foundation that makes crisis response possible; reservoir of goodwill; Experiential & Sponsorship: Sponsorship evaluation beyond reach and visibility; event and experiential marketing; brand activation; Indian examples; Regulation & Ethics: Consumer protection in promotional offers; ASCI

U5: IMC Campaign Planning, Budgeting, Evaluation & Resilience

Teaching Hours: (12)

Development Needs:

Global, Local, National, Regional

Skill Focused:

Employability, Entrepreneurship, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics, Sustainability

U5-T1. Campaign Planning Process: End-to-end IMC planning; situation analysis - the communication audit; defining target audience - demographics, psychographics, behaviour; measurable campaign objectives - awareness, consideration, trial, loyalty; Budgeting & Channel Mix: Zero-based budgeting logic; channel selection by objective, audience, and budget; allocation across channels; integration over amplification; Execution & Coordination: Creative brief as campaign anchor; coordinating across teams and agencies; campaign timeline and launch planning; Measurement & Evaluation: Channel metrics vs campaign metrics; KPIs by channel rolling up to campaign level; brand health tracking - awareness, consideration, preference, NPS; campaign post-mortem; Campaign Resilience & Contingency: Backup A and Backup B for every major component; honest probability assessment of tasks, assets, vendors, team, and external factors (weather); priority levels - critical vs flexible; Sustainability in IMC.

EXAMINATION PATTERN

COURSE NAME: DIGITAL MARKETING STRATEGIES

COURSE CODE: COH401M-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

SECTION A — Answer ALL Questions — $3 \times 5 = 15$ Marks Q.No CO RBT 1 2 3

SECTION B — Answer ALL Questions — $2 \times 10 = 20$ Marks Q.No CO RBT 4 5a) or 5b)

SECTION C — Compulsory Case Study — $1 \times 15 = 15$ Marks Q.No CO RBT 6

Total = 50 Marks

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

SECTION A — Answer ALL — 7 Questions $\times$ 5 Marks = 35 Marks

(Q6 and Q7 have internal choice)

SECTION B — Answer ALL — 5 Questions $\times$ 10 Marks = 50 Marks (Q11 and Q12 have internal choice)

SECTION C — Compulsory — 1 Question $\times$ 15 Marks = 15 Marks (No internal choice)

Total = 100 Marks

COURSE NAME: STRATEGIC COST MANAGEMENT

COURSE CODE: COH402-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Apply strategic cost management tools for competitive advantage.

CO2: Evaluate modern cost management techniques in business decision-making.

CO3: Design and implement strategic performance measurement systems.

CO4: Analyze pricing, profitability and transfer pricing decisions.

CO5: Interpret performance reports and recommend strategic improvements

CO6: Integrate cost management and performance evaluation for organizational effectiveness.

Sustainability Development Goals (SDG)

Industry, innovation and infrastructure

21st Century Skills

Analytical thinking, Creative thinking, Quality control

Course Content

U1: Foundations of Strategic Cost Management

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U1-T1. Introduction to Strategic Cost Management Meaning and Scope of Strategic Cost Management (SCM) Evolution of Cost Management Limitations of Traditional Costing Systems Traditional Cost Management vs Strategic Cost Management

U1-T2. Strategic Perspective of Cost Management Competitive Advantage and Cost Leadership Value Chain Analysis Cost Drivers and Cost Reduction Strategies Strategic Positioning and Cost Analysis

U1-T3. Contemporary Business Environment Characteristics of Modern Business Environment Impact of Globalization and Technology on Cost Management Role of Management Accountants in Strategic Decision Making

U2: Quality, Lean Systems and Process Innovation

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Entrepreneurship

Cross Cutting Issues:

Environment, Sustainability

U2-T1. Quality Cost Management Cost of Quality (COQ) Prevention, Appraisal and Failure Costs Total Quality Management (TQM)

U2-T2. Lean Management Systems Just-in-Time (JIT) Kaizen Costing 5S Methodology Total Productive Maintenance (TPM)

U2-T3. Process Innovation Business Process Re-engineering (BPR) Six Sigma Concepts Benchmarking Continuous Improvement Techniques

U3: Advanced Strategic Cost Management Techniques

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U3-T1. Activity-Based Cost Management Activity-Based Costing (ABC) Activity-Based Management (ABM) Cost Driver Analysis

U3-T2. Strategic Costing Techniques Target Costing Life Cycle Costing Customer Profitability Analysis

U3-T3. Throughput and Constraint Management Throughput Accounting Theory of Constraints (TOC) Bottleneck Analysis

U4: Strategic Revenue and Profit Management

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U4-T1. Strategic Pricing Decisions Cost-Based Pricing Market-Based Pricing Target Pricing Product Mix Decisions

U4-T2. Revenue Management Strategic Revenue Management Concepts Customer Value Analysis

U4-T3. Profitability Analysis Strategic Profit Management Customer and Product Profitability Profit Planning Techniques

U4-T4. Emerging Business Models Cost Management in Digital Business Platform-Based Business Models Service Sector Cost Management

U5: Strategic Performance Measurement and Control

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development
Cross Cutting Issues:
Sustainability

U5-T1. Strategic Performance Management Concepts and Objectives Performance Measurement Frameworks

U5-T2. Balanced Scorecard (BSC) Financial Perspective Customer Perspective Internal Business Perspective Learning and Growth Perspective

U5-T3. Performance Measurement Systems Key Performance Indicators (KPIs) Benchmarking and Best Practices Responsibility Accounting

U5-T4. Performance Evaluation Performance Prism Performance Pyramid Strategic Control Systems

U6: Transfer Pricing, Standard Costing and Performance Reporting

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U6-T1. Divisional Performance Evaluation Decentralization and Responsibility Centers Return on Investment (ROI) Economic Value Added (EVA)

U6-T2. Transfer Pricing Objectives of Transfer Pricing Market-Based Transfer Pricing Cost-Based Transfer Pricing Negotiated Transfer Pricing International Transfer Pricing Overview

U6-T3. Standard Costing and Variance Analysis Standard Costing Concepts Material, Labour and Overhead Variances Planning and Operational Variances Variance Investigation

U6-T4. Performance Reporting Preparation of Performance Reports Interpretation of Performance Reports Strategic Recommendations

EXAMINATION PATTERN

COURSE NAME: STRATEGIC COST MANAGEMENT

COURSE CODE: COH402-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA) Assessment Component Description
Marks CIA I Quizzes, role plays, objective-type tests, written assignments, discussion forums, article reviews, case analysis, etc. 20 CIA II Mid-Semester Written Examination (2 Hours Duration) 50 CIA III Group work consisting of presentations, viva voce, and report submission 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

QUESTION PAPER PATTERN FOR MID-SEMESTER EXAMINATION (MSE) Section Type Marks A Short Answer Questions (Answer ALL three questions out of which the third question has an internal choice. Each question carries five marks.) $3 \times 5 = 15$ B Conceptual / Descriptive / Problem Type Questions (Answer ALL two questions out of which one question has an internal choice. Each question carries ten marks.) $2 \times 10 = 20$ C Case Study (Compulsory) $1 \times 15 = 15$ Total 50 Marks

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE) Section Type Marks A Short Answer Questions (Answer ALL seven questions out of which Questions 6 and 7 have an internal choice. Each question carries 5 marks.) $7 \times 5 = 35$ B Conceptual / Descriptive / Problem Type Questions (Answer ALL five questions, out of which two questions have internal choice. Each question carries 10 marks.) $5 \times 10 = 50$ C Case Study (Compulsory) $1 \times 15 = 15$ Total 100 Marks

COURSE NAME: MERGERS AND ACQUISITIONS

COURSE CODE: COH402F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Understand the Concepts and importance of Mergers, Acquisitions, and Corporate restructuring to the business world.

CO2: Evaluate the effectiveness of pre- and post-merger performances.

CO3: Evaluate the value of a company for a merger, acquisition, and Corporate restructuring deal

CO4: Evaluate the effectiveness of different legal and Cultural aspects in Mergers, Acquisitions, and Corporate restructuring transactions.

CO5: Evaluate the takeover defenses to protect the company and fulfill shareholder duties.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Technological literacy

Course Content

U1: Introduction to Mergers and Acquisitions

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None, Professional Ethics

U1-T1. Introduction. History of Merger Movements. Forms of Corporate Restructuring: Expansions, Mergers and Acquisitions, Tender Offers, Joint Ventures, Sell Offs, Spinoffs, Split offs, Split ups, Divestitures, Employees Stock Option Plans (ESOPs), Equity Carve Outs, Master Limited Partnership (MLP). Corporate Control Premium, Buybacks, Standstill Agreements, Leveraged Buyouts. Merger Process: Five-stage model. Economic rationale for M&A.

Description

U1-T2. Major types of Mergers- Horizontal mergers - Vertical mergers - Conglomerate mergers - Concentric Mergers. Framework for analysis of mergers. Organization learning and organization capital. The Role of industry life cycle, Product life cycle in M&A. Role of AI in M&A decision making

U2: Cost and Benefit of Merger

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Cost and benefit analysis of merger (mergers as a capital budgeting decision) - Share exchange ratio - Problems of calculating pre- and post-merger performances.

Description

U3: Valuation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Multiples – various kinds of multiples and how to view this from the perspective of M&A. What are the factors that impact the multiple, and how to find the right multiple to value the company? Risk-free rate of return – Key things to remember while doing cross-border M&A. Beta- What factors impact beta. Levered and unlevered beta. Valuation during special situations of M&A- growth companies, distress companies, stable growth companies, listed and unlisted companies, volume and liquidity discount

Description

U3-T2. Companies with negative cash flows, cash risk companies, IRR expectations, and control premium. Valuation for cash Vs stock deals. Common mistakes/biases at the time of valuation. Negotiation for valuation in M&A deals – convert structure, warrant structure, and other ways of structuring options. Special situation in valuation – SEBI valuation rules, takeover code valuation rules, FDI valuation rules. AI-assisted multiple selection and peer comparison - AI in forecasting cash flows and IRR

U4: Legal and Cultural Aspects in Merger

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Organizational and human aspects – managerial challenges of M & A - Legal and regulatory framework of M & A – provisions of Companies Act - Indian Income Tax Act - SEBI takeover code.

Description

U5: Take Over Defences

Teaching Hours: (8)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Takeover defences – financial defensive measures – Coercive offers and defence – anti-takeover amendments – poison pill defence. Case examples: AI use in modern corporate defence

Description

Essential Reading

Donald M. DePamphilis., Mergers, Acquisitions, and Other Restructuring Activities (10th Edition).
Elsevier

U1-T1. Introduction to financial modelling and its role in decision-making, Distinction between data spreadsheets and dynamic financial models, Classification and applications of financial models in business, investment and valuation contexts, Core competencies and analytical mindset of an effective financial modeller, Principles of structured model architecture and documentation, Selection of appropriate modelling tools and platforms, Excel environment for financial modelling: workbook structure and n Description

Introduction to financial modelling and its role in decision-making, Distinction between data spreadsheets and dynamic financial models, Classification and applications of financial models in business, investment and valuation contexts, Core competencies and analytical mindset of an effective financial modeller, Principles of structured model architecture and documentation, Selection of appropriate modelling tools and platforms, Excel environment for financial modelling: workbook structure and navigation, Advanced Excel functionalities for model building, Application of financial, logical, statistical and mathematical functions in modelling, Use of lookup and reference functions for data integration, Professional formatting standards and visualization techniques, Productivity enhancement through shortcuts and automation, Dynamic array functions and data validation, Pivot tables for scenario and

sensitivity analysis, Add-ins and analysis toolpak applications, Complex formula construction and nested logic, Use of named ranges and model scalability, Date functions and timeline management, Linking and managing external data sources, Operating system and Excel keyboard shortcuts for financial modellers

U2: Errors Fixing and Visualisation

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Advanced Excel functions: IF, VLOOKUP, INDEX+MATCH, XLOOKUP, data validation rules, Designing dynamic dashboards and interactive visual elements, Characteristics of high-quality financial models, Documentation standards and maintaining transparency while modelling, Debugging techniques – error tracing, formula auditing, and identifying circular references, Avoiding common modelling errors and establishing error-checking controls, Data visualisation: working with chart types including combo chart

Description

Advanced Excel functions: IF, VLOOKUP, INDEX+MATCH, XLOOKUP, data validation rules, Designing dynamic dashboards and interactive visual elements, Characteristics of high-quality financial models, Documentation standards and maintaining transparency while modelling, Debugging techniques – error tracing, formula auditing, and identifying circular references, Avoiding common modelling errors and establishing error-checking controls, Data visualisation: working with chart types including combo charts, waterfall charts, bubble charts, Creating multi-axis charts, sparklines, and dynamic data ranges, Introduction to Excel automation basics (using simple macros for repetitive tasks)

U3: Financial Statement Analysis

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Understanding financial reporting frameworks and users of financial information, Structure and interlinkages of financial statements, Detailed analysis of Balance Sheet with focus on asset quality and capital structure, Income Statement evaluation: revenue drivers, cost behavior and margin analysis, Cash Flow Statement interpretation with operating, investing and financing linkages, Common-size financial statements and structural analysis, Time-series and cross-sectional analysis, Peer comparison

Description

Understanding financial reporting frameworks and users of financial information, Structure and interlinkages of financial statements, Detailed analysis of Balance Sheet with focus on asset quality and capital structure, Income Statement evaluation: revenue drivers, cost behavior and margin analysis, Cash Flow Statement interpretation with operating, investing and financing linkages, Common-size financial

statements and structural analysis, Time-series and cross-sectional analysis, Peer comparison and industry benchmarking, Advanced ratio analysis: working capital efficiency, operating performance, financial leverage, asset utilisation and market-based ratios, Assessment of earnings quality and persistence, Cash flow adequacy, free cash flow and sustainability analysis, Identification of accounting distortions and financial warning signals, Analysis of off-balance-sheet exposures and contingent liabilities, Integrating financial statement insights for forecasting, scenario analysis and strategic decision-making.

U4: Building Financial Models

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Collecting and cleaning historical data, Developing business drivers and growth assumptions, Forecasting revenue, costs, working capital, and capital expenditure, Scenario analysis tools:-Scenario Manager- What-if analysis, Distinguishing scenario vs sensitivity vs stress testing, Integrating assumptions into dynamic models, Model review checklist and quality assurance methods, Creating integrated financial statements:- Pro forma Income Statement- Projected Balance Sheet- Cash Flow Forecast, Bal

Description

Collecting and cleaning historical data, Developing business drivers and growth assumptions, Forecasting revenue, costs, working capital, and capital expenditure, Scenario analysis tools:-Scenario Manager- What-if analysis, Distinguishing scenario vs sensitivity vs stress testing, Integrating assumptions into dynamic models, Model review checklist and quality assurance methods, Creating integrated financial statements:- Pro forma Income Statement- Projected Balance Sheet- Cash Flow Forecast, Balancing mechanisms and automated error checks.

U5: Model Creation and Applications

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Company performance analysis & business model evaluation, Cash flow modelling and free cash flow estimation, Variance analysis and break-even modelling, Capital budgeting & investment appraisal: NPV, IRR, Payback, Profitability Index, Cost of capital estimation: WACC and its components, Bond valuation, yield analysis, and amortisation schedules, Portfolio analysis, beta estimation, and risk-return concepts, Lease vs buy modelling and capital structure impact, Market behaviour interpretation

Description

Company performance analysis & business model evaluation, Cash flow modelling and free cash flow estimation, Variance analysis and break-even modelling, Capital budgeting & investment appraisal: NPV, IRR, Payback, Profitability Index, Cost of capital estimation: WACC and its components, Bond valuation,

yield analysis, and amortisation schedules, Portfolio analysis, beta estimation, and risk-return concepts, Lease vs buy modelling and capital structure impact, Market behaviour interpretation and trend modelling, Group project:- Develop a complete financial model for a company/project- Presentation of model assumptions, outputs, and strategic recommendations.

Essential Reading

1. Day, A. (2013). Mastering financial modelling in Microsoft Excel (3rd ed.). Pearson.
2. Sengupta, C. (2009). Financial analysis and modeling using Excel and VBA (2nd ed.). Wiley.

EXAMINATION PATTERN

COURSE NAME: FINANCIAL MODELLING

COURSE CODE: COH402F-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

5 CIA components should take place. The total should be divided into 50 marks each.

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ESE - 100 Marks

COURSE NAME: STRATEGIC BRANDING

COURSE CODE: COH402M-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Understand key concepts of brand management, including brand identity, brand strategy, and measuring brand performance, to develop and sustain brand equity.

CO2: Analyze various brand elements such as brand names, logos, slogans, and packaging, and apply principles of effective brand design, including digital branding aspects.

CO3: Evaluate brand resonance stages and the brand value chain to understand brand positioning, financial valuation, and impact on market performance.

CO4: Examine brand extension strategies and brand architecture models to design coherent brand portfolios and corporate branding frameworks.

CO5: Understand intellectual property rights (IPR) related to branding, including trademarks and patents, and their role in enhancing brand equity and commercialization.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Resilience flexibility and agility

Course Content

U1: Strategic Brand Management Process

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U1-T1. Definition - Things that can be branded - Branding Challenges and Opportunities - Brand Image, Brand Identity, Brand Strategy - Kapferer's Brand Identity Prism - Identifying and developing brand plans – Designing and implementing brand marketing programs– Measuring and interpreting brand performance – Growing and sustaining brand equity. ESG communication, responsible innovation, ethics of green claims. Case Study: McDonald's Core Brand Values

U2: Brand Taxonomy and Brand Aesthetics

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U2-T1. Brand Elements - Criteria for Choosing Brand Elements - Brand Names: Lippincott's Brand Name Taxonomy, Brand Name Linguistic Characteristics: Logos, Symbols and Trademarks: Types of Logos, Principles of Logo Designing - Characters – Slogans and Jingles - Packaging and Signage - Mascots - Brand Elements in the Digital Era Case Study: The Amul Girl: Why She's Still Standing?
U3: Brand Resonance and Brand Value Chain

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U3-T1. CBBE and Larry Percy's Experiment– Brand Positioning – Brand Resonance Pyramid (Salience – Performance – Imagery – Judgements – Feelings – Resonance) – Brand Value Chain (Value Stages – Program Quality Multiplier – Marketplace Conditions Multiplier – Investor Sentiment Multiplier) - AI-enabled brand analytics, personalisation, sentiment analysis, and generative content, Financial Valuation and Accounting of Brands. Case Study: L'Oreal's Customer-Based Brand Equity
U4: Brand Extension and Brand Architecture

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

None

U4-T1. Ansoff's Growth Share Matrix - Edward Tauber's Guidelines for Brand Extension – Merits and Demerits of Extension – Line Extension – Category Extension; Brand Architecture Strategy - Brand Product Matrix - Brand Portfolios - Brand Hierarchies - Corporate Branding and Corporate Brand Dimensions. Case Study: Stretching Brands To The Limit – A Case Study On Dettol.
U5: Fundamentals of IPR for Branding and Marketing

Teaching Hours: (12)

Development Needs:

Global, Local, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Concepts and Significance of IPR - Types of IPR: Patents, Trademarks, Copyrights, Industrial Designs, Geographical Indications - Definition, Importance, and Types of Trademarks - Trademark Registration Process in India (Legal Framework, Application Procedure) - Role of IPR in enhancing Brand Equity and Commercial Value - Basics of IP Valuation and Brand Monetization. Case Study: KSRTC Vs KSRTC
Essential Reading

EXAMINATION PATTERN

COURSE NAME: STRATEGIC BRANDING

COURSE CODE: COH402M-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I 20

CIA II (Section A $3 \times 5 = 15$, Section B $2 \times 10 = 20$, Section C $1 \times 15 = 15$) = 50

CIA III 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ETE (Section A $7 \times 5 = 35$, Section B $10 \times 5 = 50$, Section C $15 \times 1 = 15$) = 50

COURSE NAME: CONSUMER BEHAVIOUR AND NEUROMARKETING

COURSE CODE: COH402M-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Analyse traditional and behavioural models to map the consumer decision-making process ethically.

CO2: Evaluate how internal psychological factors like motivation, perception, and attitude shape consumer choices.

CO3: Analyse the impact of family, social class, reference groups, and culture on consumer behaviour.

CO4: Explain brain anatomy and neuromarketing tools used to capture subconscious consumer data ethically.

CO5: Apply neuromarketing insights to design effective pricing, packaging, advertising, and retail strategies.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Good health and well-being, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Foundations of Consumer Behaviour & Decision Making

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Introduction to Consumer Behaviour - Definition, Scope, and Evolution - Consumer vs. Customer - Traditional Models of Consumer Behaviour - Economic Man Model - Psychoanalytic Model - Sociological Model - Howard-Sheth Model of Buying Behaviour; The Consumer Decision-Making Process - Need Recognition - Information Search - Evaluation of Alternatives - Purchase Decision - Post-Purchase Behaviour and Cognitive Dissonance - Bounded Rationality - Heuristics - Framing Effects in Consumer Choices
Description

U2: Internal Psychological Influences on Consumers

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Consumer Motivation and Involvement - Maslow's Hierarchy of Needs Applied to Modern Branding - McClelland's Trio of Needs - Motivational Conflicts - Consumer Involvement Concept; Perception and Sensation - Dynamics of Perception - Subliminal Perception - Perceptual Selection, Organisation, and Interpretation in Marketing; Learning and Memory - Behavioural Learning Theories - Cognitive Learning Theory - Memory Structures - Brand Retrieval Cues; Attitude Formation and Change - Tricomponent Attitude Model - Multi-Attribute Attitude Models - Strategies for Changing Consumer Attitudes
U3: External and Socio-Cultural Influences

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Reference Groups and Social Media Influences - Types of Reference Groups - Opinion Leadership - Word-of-Mouth Marketing - Influencer Marketing and Digital Community Dynamics; Family and Social Class - Family Life Cycle Stages and Changing Consumption Patterns - Family Decision-Making Roles - Social Class Mobility and Status Symbols; Culture and Sub-Culture - Impact of Culture, Core Values, and Sub-Cultures - Geographic, Religious, and Age-Based Sub-Cultures; Diffusion of Innovations - Innovation Adoption Process - Categories of Adopters.

U4: Introduction to Neuromarketing and the Brain

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Neuromarketing: Definition, History, and Scope - Traditional Market Research vs. Neuromarketing - Limitations of Self-Reported Consumer Data; Anatomy of the Consumer Brain - The Triune Brain Model - Key Brain Structures - Role of Neurotransmitters in Buying Decisions; Neuromarketing Tools and Technologies - Metabolic and Hemodynamic Tools - Electrical Tools - Biometrics; Ethics in Neuromarketing.

U5: Practical Applications of Neuromarketing in Business

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Neuro-Pricing and Product Design - Price Perception and the Pain of Paying - Optimising Product Packaging - Sensory Marketing; Neuro-Advertising and Digital Engagement - Analysing Ad Effectiveness Using Eye-Tracking and EEG - Measuring

Emotional Engagement and Memory Encoding - Website and UX/UI Optimisation Using Neuromarketing Principles The Neuro-Store and Shopper Marketing - In-Store Navigation and Path-to-Purchase Optimisation - Shelf-Placement Mechanics - Lighting and Ambient Effects on Subconscious Buying Behaviour; Pepsi vs. Coke fMRI Study - Campbell's Soup Packaging Redesign - Future of Neuro-AI and Predictive Consumer Analytics

EXAMINATION PATTERN

COURSE NAME: CONSUMER BEHAVIOUR AND NEUROMARKETING

COURSE CODE: COH402M-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

50 Marks

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35 Marks

Section B - 5 x 10 = 50 Marks

Section C - 1 x 15 = 15 Marks

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COH403F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain the concept, characteristics, and role of alternative investments in a portfolio.

CO2: Differentiate between traditional and alternative asset classes.

CO3: Analyze hedge funds, private equity, real estate, commodities, and structured products

CO4: Evaluate risk-return profiles and performance measurement techniques of alternative investments.

CO5: Understand regulatory, ethical, and operational aspects associated with alternative assets and apply portfolio diversification strategies using alternative assets.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Alternative Investments

Teaching Hours: (4)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Definition and evolution of alternative investments, Differences between traditional and alternative assets, Role in portfolio diversification, Market players and trends, Overview of major asset classes; Private Credit- (Direct Lending, Distressed Debt, Mezzanine Financing)

U2: Hedge Funds

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Structure, strategies, and classifications (long/short, event-driven, global macro, arbitrage), Directional: Global Macro, Managed Futures, Event-Driven: Distressed Debt, Merger Arbitrage. , Relative Value: Long/Short Equity, Fixed Income Arbitrage. Risk-return characteristics, Hedge fund performance evaluation (Sharpe, Sortino, Information ratio), Fees and incentives (2 & 20 model), Regulatory and ethical issues.

Description

Case Study Discussion: The Collapse of Long-Term Capital Management (LTCM) - A lesson in leverage and correlation breakdown.

U3: Private Equity and Venture Capital

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Structure of private equity funds, Stages of investment: venture capital, growth capital, buyouts, Valuation of private firms (DCF, multiples, comparables), Exit routes: IPO, M&A, secondary sale, Case studies: Blackstone, Sequoia Capital.

U4: Real Estate and Infrastructure Investments

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Background of Real Estate Funds in India, Commencement of REIT in India, Types: residential, commercial, REITs, infrastructure funds, Real estate valuation techniques, Risks and returns in property investment, Global and Indian REIT market trends, Performance of Indian REIT Case Discussion on Embassy REIT.

U5: Commodities and Derivatives & Structured Products and Other Alternatives

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Physical vs. derivative-based commodity investment, Types of Commodities traded in the market, Commodity indices and ETFs, Pricing dynamics and risk management, Role in inflation hedging and portfolio diversification, Activity: Live commodity market tracking and report, Overview of structured notes, CDOs, CLOs, MBS, Infrastructure funds, art funds, collectibles, and digital assets - crypto-assets, Decentralized Finance, Risk-return implications

U6: Global and Indian regulatory framework (SEBI, AIF Regulations 2012)

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U6-T1. Ethics in alternative investing, ESG and sustainability in alternatives, Future of alternative assets (tokenization, AI, green infrastructure funds), Due Diligence (DD): A brief overview of Operational DD vs. Investment DD.
Essential Reading

CAIA Level I: An Introduction to Core Topics in Alternative Investments – CAIA Association

· Alternative Investments: Instruments, Performance, Benchmarks, and Strategies by Donald R. Chambers et al.

· Private Equity: History, Governance, and Operations – Harry Cendrowski

· Hedge Funds: Quantitative Insights – François-Serge Lhabitant

· Alternative Investments: A Primer for Investment Professionals – CFA Institute Research Foundation

EXAMINATION PATTERN

COURSE NAME: ALTERNATIVE INVESTMENTS

COURSE CODE: COH403F-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component Description Marks CIA I Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. 20 CIA II Mid Semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 CIA III Group work consisting of presentations- Viva voce- and report submission. 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: FINTECH ECOSYSTEMS

COURSE CODE: COH403F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the evolution, architecture, and key components of the FinTech ecosystem, including digital payments, blockchain, and financial data systems.

CO2: Analyze the impact of emerging technologies, including Artificial Intelligence, Blockchain, and Big Data, on financial inclusion, efficiency, and regulatory compliance.

CO3: Evaluate various FinTech business models and digital financial services in terms of innovation, scalability, and risk management.

CO4: Assess the ethical, legal, and cybersecurity challenges in financial technology and propose responsible frameworks for digital finance governance.

CO5: Demonstrate critical thinking and leadership in designing technology-enabled financial strategies that align with sustainability, transparency, and inclusive growth.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to FinTech Ecosystem

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Meaning, definition, and scope of FinTech- Historical evolution and global trends- Key components: Payments, lending, wealth management, insurance, RegTech- FinTech ecosystem: Start-ups, incumbents, regulators, and consumers- Overview of global FinTech hubs (Singapore, UK, India, USA, China)

U2: Technologies Driving FinTech Innovation

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Role of AI, Machine Learning, Big Data, IoT in finance- Blockchain technology:

Concept, working, use cases- Cryptocurrencies and digital assets: Bitcoin, Ethereum, CBDs- Cloud computing, APIs, and open banking frameworks- Case studies: UPI (India), Revolut, PayPal, Ant Financial

U3: FinTech Business Models and Applications

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Classification of FinTech models: Payments, lending, wealth-tech, insur-tech- Digital banks and neobanks- Crowdfunding and peer-to-peer lending- Robo-advisory and automated investment platforms- FinTech value chains and innovation ecosystems- Start-up case studies

U4: Risk, Regulation, and Governance in FinTech

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Risk management in FinTech operations- Cybersecurity issues and digital identity management- Data privacy, protection laws, and regulatory sandboxes- AML (Anti-Money Laundering), KYC (Know Your Customer), and compliance- Role of central banks and financial regulators- Ethical issues in algorithmic decision-making

U5: FinTech for Sustainability and Inclusive Growth

Teaching Hours: (13)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics, Sustainability

U5-T1. FinTech and Sustainable Development Goals (SDGs)- Green FinTech: Financing renewable energy and carbon markets- Financial inclusion through digital platforms- Social impact investing and microfinance innovation- Designing sustainable and responsible digital finance models- Leadership, ethics, and the future of digital finance

Essential Reading

1. Desai, K., Ramachandran, N., & Mahalakshmi, S. (2025). The Rise of FinTech in India's Financial Ecosystem. Springer.
1. Covers core concepts on the evolution, ecosystem, and regulatory environment of Indian FinTech.
3. PwC India. (2025). FinTech – powering India's USD 5 trillion economy by fostering innovation and inclusion [PDF]. PwC India.
3. Provides practical insights on India's digital payments, financial inclusion, and government initiatives.

5. Phadke, S. (2024). The Revival of Indian Finance: Mission 2025. Sage Publications.
5. Examines the overall Indian financial ecosystem with emphasis on policy, FinTech innovation, and economic goals.

COURSE NAME: LOGISTICS AND SUPPLY CHAIN MANAGEMENT

COURSE CODE: COH403M-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Understand the core concepts and evolution of logistics and supply chain management.

CO2: Analyze supply chain operations and key performance drivers.

CO3: Apply inventory management tools for efficient planning and control.

CO4: Evaluate transportation systems and logistics networks for business efficiency.

CO5: Assess digital technologies that enhance supply chain sustainability and resilience.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Dependability and attention to detail, Resilience flexibility and agility

Course Content

U1: Logistics Aspects of SCM

Teaching Hours: (12)

Development Needs:

Global, Local

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics, Sustainability

U1-T1. History and Evolution of Logistics and Supply Chain Management - Definitions, Differences and Similarities of Logistics and Supply Chain Management - Principles of Logistics Management - 7Rs of Logistics - Fixed and Flexible Logistics - Inbound, Outbound and Business Logistics –1PL, 2PL, 3PL, 4PL, 5PL, 6PL - Single & Multi Echelon Inventory Model of Logistics

U2: Operational Aspects

Teaching Hours: (14)

Development Needs:

Global, Local

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Nature, Objectives and Scope of Supply Chain Management - Value Chain Analysis – Value Web Analysis - Value in Supply Chain - Process View of Supply Chains - Drivers of Supply Chains - Types: Push-Based Supply Chain – Pull-Based Supply Chain – Agile Supply Chain - Operational Aspects: Bull Whip Effect - Just-in-Time – Kanban - Kaizen – Vendor Managed Inventory.

U3: Inventory Management Aspects

Teaching Hours: (14)

Development Needs:

Global, Local

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Inventory Functionality - Inventory Carrying Cost - Inventory Planning - EOQ & EOQ Adjustments - Managing Uncertainty: Demand Uncertainty, Performance Cycle Uncertainty, Safety Stock with Combined Uncertainty - Inventory Management Policies and Practices: Perpetual Review, Periodic Review, Reactive Methods, Fair Share Allocation, Requirements Planning, Quick Response, VMI, Profile Replenishment

U4: Transportation Economics and Transportation Geography

Teaching Hours: (10)

Development Needs:

Global, Local

Skill Focused:

Skill Development

Cross Cutting Issues:

Sustainability

U4-T1. Transport Economics: Travel Demand – Travel Supply – Travel Equilibrium - Functions - Participants – Principles; Transport Geography: Indian Road and Railway Infrastructure – Indian Inland Waterways - Indian Harbours – Key Global Harbours - ICD CFS CONCOR – INCO Terms

U5: Digital Logistics and Supply Chain Management

Teaching Hours: (10)

Development Needs:

Global, Local

Skill Focused:

Skill Development

Cross Cutting Issues:

Environment

U5-T1. Digital Supply Chain Transformation: Blockchain, AI, Robotics, and Smart Contracts; Omni-channel Retailing and Last-mile Delivery Solutions; Closed-loop and Circular Supply Chains- Green SCM; Risk Management in Global Events: Resilience Planning (COVID, Climate Change) - Electronic SCM Fundamentals
Essential Reading

2. Christopher, M. (2021). Logistics and supply chain management (6th ed.). Pearson.

2. Jacobs, F. R., & Chase, R. B. (2020). Operations and supply chain management (15th ed.). McGraw-Hill Education.

2. Bowersox, D., Closs, D., & Cooper, M. B. (2023). Supply chain logistics management (6th ed.). McGraw-Hill Education.

EXAMINATION PATTERN

COURSE NAME: LOGISTICS AND SUPPLY CHAIN MANAGEMENT

COURSE CODE: COH403M-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA 1 = 20 marks,

CIA 2 = 50 marks (5*3=15 marks, 10*2=20 marks, 15*1=15 marks)

CIA 3 = 20 marks.

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A: 7*5=35 marks

Section B: 10*5=50 marks

Section C: 15*1=15 marks

COURSE NAME: RETAIL MANAGEMENT AND VISUAL MERCHANDISING

COURSE CODE: COH403M-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Analyze various retail theories and apply them to explain retail evolution and formats in Indian and global contexts.

CO2: Evaluate retail location decisions using geodemographic and spatial analysis models to recommend optimal retail site selection

CO3: Design and construct effective retail store layouts and planograms that maximize customer flow and merchandise visibility.

CO4: Assess the impact of retail environment aesthetics and sensory marketing on consumer behavior and purchase decisions.

CO5: Apply retail analytics tools and emerging technologies to measure, interpret, and improve retail performance metrics.

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Resilience flexibility and agility

Course Content

U1: Retailing Fundamentals and Theories

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics, Sustainability

U1-T1. Definition – Nature, Scope & Functions – Importance of Retailing in Indian and Global Contexts - Food and Nonfood Retail Formats, Web, Non-Store Based and other forms of Nontraditional Retailing; Retailing Mix; Theories of Retailing: Theory of Natural Selection, Wheel of Retailing Theory, Accordion Theory, Polarization Theory, Melting Pot Theory.

U2: Retailing Geodemographic Techniques

Teaching Hours: (12)

Development Needs:

National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Sustainability

U2-T1. Trading Area Analysis: Retail Locations Types, Location Decision Process; Locational Positioning; Location Assessment Techniques: Analogue Method, Multivariate Statistical Techniques, Spatial Interaction Models Reilly's Law of Gravitation, Knowledge Based Techniques; Demand Estimation Techniques: Huff's Gravity Theory, Saturation Theory, Buying Power Index.

U3: Retail Designs, Layouts & Planograms

Teaching Hours: (12)

Development Needs:

Global, Local

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Sustainability

U3-T1. Types of Layouts: Grid Layout, Herringbone Layout, Loop or Racetrack Layout, Free-flow Layout, Spine Layout, Diagonal Layout, Angular Layout, Geometric Layout, and Mixed or Hybrid Layouts – Cognitive Maps and Store Maps - Planogram - Types of Planogram - Merchandize Presentation Techniques (Traditional, Bundled and Planograms)

U4: Retail Designs, Aesthetics & Psychology

Teaching Hours: (12)

Development Needs:

Global, Local

Skill Focused:

Employability

Cross Cutting Issues:

Gender, Human Values, Professional Ethics

U4-T1. Exterior Design Decisions – Interior Design Decisions - General Rules of Customer Traffic - Theory of Eyelevel Buylevel - Mehrabian-Russell Model - Drivers of Behaviour (Arousal, Pleasure and Dominance) - Sensory Marketing Techniques in Retailing - Color Psychology in Retailing - Hedonic Shopping Motives - Experiential Retailing

U5: Fundamentals of Retailing Analytics and Technology

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability, Entrepreneurship

Cross Cutting Issues:

Professional Ethics, Sustainability

U5-T1. Retail Analytics Fundamentals - Role of Data in Retail Decision Making - Types of Retail Data and Sources - Market Basket Analysis and Association Rules - Point-of-Sale Systems and RFID - Automated Inventory Management Systems - Virtual Reality (VR) and Augmented Reality (AR) Applications

Essential Reading

EXAMINATION PATTERN

Each question carries ten marks) $5 \times 10 = 50$ C Case Study (Compulsory) $1 \times 15 = 15$

COURSE NAME: FINANCIAL DERIVATIVES

COURSE CODE: COH404F-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Explain fundamental concepts, evolution, and economic functions of derivatives.

CO2: Apply the mechanics of forwards and futures, including margining, MTM, and pricing.

CO3: Analyse hedging mechanisms using futures by examining basis risk and hedge ratios.

CO4: Evaluate option strategies by comparing payoff structures and risk–return trade-offs under different market conditions.

CO5: Explain swaps, commodity markets, and emerging derivative instruments.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals, Sustainable cities

21st Century Skills

Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Derivatives

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. The meaning, scope, and evolution of financial derivatives, highlighting their economic rationale and functional significance. Structure and purpose of forwards, futures, options, and swaps, categories of market participants, and the role of derivatives in hedging, speculation, and arbitrage. Distinctions between exchange-traded and OTC markets, global developments, regulatory perspectives, and the evolution of derivative markets in India are examined.

Description

Issues concerning criticism, misuse, and the requirements for an efficient derivative market structure

U2: Forwards and Futures – Structure, Mechanics and Pricing

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Contractual features, trading framework, and operational mechanics of forward and

futures contracts. It includes contract specifications, settlement procedures, tick size, contract cycles, delivery systems, and the clearing and margining mechanism comprising initial margin, maintenance margin, and daily mark-to-market. Pricing relationships are developed through the cost-of-carry model, expectations approaches, basis concepts, contango, and backwardation.

Description

Applications in equity, currency, and commodity markets are integrated to illustrate pricing and risk-transfer mechanisms.

U3: Hedging with Futures

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Principles and frameworks for risk hedging using futures contracts. Long and short hedge structures, cross-hedging applications, and the influence of basis and basis risk on hedge effectiveness are examined. The estimation and interpretation of hedge ratios are incorporated, along with distinctions between static and dynamic hedging approaches. The conceptual structure of strip hedges and stack-and-roll hedges is discussed within the context of hedging design.

U4: Options – Concepts, Strategies and Valuation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Option classification, rights and obligations, intrinsic and time value, moneyness, volatility, and price behaviour. Option market terminology, trading procedures, settlement systems, and interpretation of option chain data. Elementary option strategies—bull and bear spreads, butterfly spreads, straddles, and strangles—are presented through conceptual payoff structures.

Description

Introductory valuation techniques are included through the Binomial Model and the Black–Scholes Model, along with a conceptual outline of Option Greeks and their relevance to risk assessment

U5: Swaps, Commodity Derivatives and Emerging Derivatives

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Swap structure, mechanics, and applications of interest rate swaps, currency swaps,

and other traditional swap arrangements used for transforming cash flow profiles, managing interest rate exposure, and restructuring liabilities. advantages, limitations, and standard market conventions associated with swaps. Commodity derivatives markets, including futures and options on commodities, contract characteristics, market architecture, and the role of major domestic and global commodity exchanges.

Description

The conceptual distinction between commodities and financial derivatives is highlighted along with regulatory developments in India.

Emerging derivative instruments such as weather derivatives, carbon and energy derivatives, credit derivatives including Credit Default Swaps (CDS), and structured products such as ABS, MBS, and CDOs are also covered. Emphasis is placed on recent innovations, evolving global practices, and regulatory perspectives relevant to these new-market instruments.

Essential Reading

- Hull, J. C., Options, Futures and Other Derivatives, 11th Edition, Global Edition (Pearson, 2021)
- Srivastava, Rajiv, Derivatives and Risk Management, 2nd Edition (Oxford University Press)

COURSE NAME: FIXED INCOME SECURITIES

COURSE CODE: COH404F-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the structure, functioning, instruments, and market conventions of fixed income markets in India and globally.

CO2: Apply bond valuation techniques and yield measures to price fixed income securities and interpret price–yield relationships using analytical tools.

CO3: Analyse interest rate behaviour using term structure theories, duration, and convexity measures to assess interest rate risk in fixed income securities.

CO4: Evaluate credit risk, credit rating methodologies, and structured fixed income products to determine their risk–return characteristics.

CO5: Design hedging strategies and construct passive and active fixed income portfolios using derivatives to meet specific investment objectives.

Sustainability Development Goals (SDG)

Climate action, Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure, Peace, justice and strong institutions, Sustainable cities

21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Dependability and attention to detail, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Fixed Income Markets

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. Introduction to Fixed Income Markets Nature and characteristics of fixed income securities, Overview of debt markets in India and globally, Primary and secondary markets, Government securities market structure, Corporate bond market structure, Bond price quotations, settlement, day-count conventions, clean price, dirty price, accrued interest, Repo and reverse repo, money market instruments.

Description

U2: Bond Valuation and Yield Measures

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Bond Valuation and Yield Measures Pricing of fixed income securities, Cash flow valuation, Yield to maturity (YTM), Yield to call (YTC), Yield to put (YTP), Yield to worst (YTW), Current yield vs redemption yield, Spot rates & forward rates (introduction), Bootstrapping the yield curve, Price–yield relationship. Bond valuation theorems.
Description

U3: Term Structure & Interest Rate Risk

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U3-T1. Term Structure & Interest Rate Risk Term structure of interest rates, Spot and forward rates; theories of the yield curve: Expectations theory, Liquidity preference theory, Market segmentation, Duration measures: Macaulay, Modified, Effective, Convexity, Price sensitivity & interest rate risk, Immunization strategies, Measuring reinvestment risk and market risk.
Description

U4: Credit Risk & Structured Products

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U4-T1. Credit Risk & Structured Products Corporate bond features, Credit risk: default, downgrade, migration risk, Credit rating frameworks (CRISIL, ICRA, Moody's, S&P), Credit spreads, Credit derivatives (introduction), Securitisation, Mortgage-Backed Securities (MBS), Asset-Backed Securities (ABS), Prepayment risk & extension risk, CDO fundamentals.
Description

U5: Fixed Income Derivatives & Portfolio Strategies

Teaching Hours: (12)

Development Needs:

Global, National

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics, Sustainability

U5-T1. Fixed Income Derivatives & Portfolio Strategies Interest rate futures, Forward Rate Agreements (FRA), Interest rate swaps, Options on bonds, Hedging interest rate exposure, Bond portfolio management, Passive strategies: Buy and hold, Indexing, Active strategies:

Yield curve trades, Sector rotation, Bullet, barbell, ladder strategies, Portfolio performance evaluation.

Description

Interest rate futures, Forward Rate Agreements (FRA), Interest rate swaps, Options on bonds, Hedging interest rate exposure, Bond portfolio management, Passive strategies: Buy and hold, Indexing, Active strategies: Yield curve trades, Sector rotation, Bullet, barbell, ladder strategies, Portfolio performance evaluation.

Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: SALES MANAGEMENT AND CRM

COURSE CODE: COH404M-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Understanding the concept of sales management.

CO2: Analysing the strategies for sales management and linking them to the overall marketing plan.

CO3: Examining the interlinkages between Customer Relationship Management and Sales Management.

CO4: Interpreting the various customer relationships and customer experience strategies

CO5: Designing an effective customer relationship strategy by taking into customer life cycle

Sustainability Development Goals (SDG)

Consumption and production, Decent work and economic growth, Industry, innovation and infrastructure

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Leadership and social influence, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to Sales Management

Teaching Hours: (12)

Development Needs:

Global, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Nature and role of selling. Characteristics of Modern Selling. Types of Selling. Electronic Selling: Meaning of Sales Management. Objectives of Sales Management. Relationship between sales and marketing. Sales management skills: conceptual and decision-making skills, People skills, and technical skills. Functions of sales managers. Managing a sales team. Environmental and managerial factors that impact sales.

U2: Sales Management Strategies

Teaching Hours: (12)

Development Needs:

Global, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Sales and marketing plan. The place of selling in a marketing plan. Forecasting sales and sales budget. Sales channels. Competitive settings and sales management strategies. Personal selling strategies. Customer segmentation and targeting for sales: segmenting markets, choosing target segments and tailoring sales approaches to each. Sales technology and digital selling strategies. Ethical issues in sales management.

U3: Customer Relationship Management

Teaching Hours: (12)

Development Needs:

Global, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Importance of the relationship with customers. Meaning and definition of CRM. Constituents of CRM, connecting CRM with customer loyalty and satisfaction. Relationship management theories, E-CRM. CRM technology and software tools, AI-driven CRM systems, predictive sales analytics, personalisation, chatbots, & ethical data use.

U4: Customer Relationship Management and Customer Experiences

Teaching Hours: (12)

Development Needs:

Global, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Understanding customer experience. Experiential marketing strategies and tactics. Customer experience and the role of CRM. Creating value for consumers: value from products, services, processes, people, physical evidence, communications, and channels. Relationship Marketing Strategies.

U5: Customer Life Cycle and CRM

Teaching Hours: (12)

Development Needs:

Global, Regional

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Customer life cycle, customer retention, and strategies for customer retention. Customer Journey mapping. Managing relationships with the suppliers and partners. Organizational issues and customer relationships. Developing an overall CRM and marketing Strategy, Embedding green perspectives through sustainable selling. Future trends in CRM.

Essential Reading

- 1.Sales Management: Teamwork, Leadership and Technology (6th Edition) by Chaarlesm M. Futrell.
- 2.Sales Management: Decisions, strategies and cases (5th Edition) by Richard R. Still, Edward W Cundiff and Norman A. P. Govoni
- 3.Customer Relationship Management: Concepts and Technologies (2nd Edition) by Francis Buttle

EXAMINATION PATTERN

COURSE NAME: SALES MANAGEMENT AND CRM

COURSE CODE: COH404M-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA I 20, CIA II 50, CIA III 20.

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

ETE 100

COURSE NAME: MARKETING ANALYTICS AND INTELLIGENCE

COURSE CODE: COH404M-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Analyze marketing data using analytical techniques to support strategic decisions.

CO2: Apply predictive models to understand consumer behavior and market opportunities.

CO3: Evaluate digital marketing performance through marketing dashboards and KPIs.

CO4: Apply AI tools to conduct market research and generate actionable customer insights.

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Technological literacy

Course Content

U1: Unit I: Foundations of Marketing Analytics

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U1-T1. Evolution of marketing analytics; Data-driven marketing; Marketing intelligence systems; Types and sources of marketing data; Structured and unstructured data, Big data in marketing; Marketing Information Systems (MKIS); Role of analytics in strategic marketing; Introduction to business intelligence.

U2: Unit II: Customer Analytics and Market Intelligence

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Customer data platforms; Customer lifetime value (CLV); Customer segmentation; RFM analysis; Market Basket analysis; Consumer behavior analytics; Competitive intelligence; Sentiment Analysis, Semiotic Analysis, Customer Journey Analytics.

U3: Unit III: Digital Marketing Analytics

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U3-T1. Web analytics; Social media analytics; SEO and SEM metrics; Email marketing analytics; Campaign performance measurement; Marketing KPIs; Attribution models; Conversion funnel analysis; Marketing dashboards; Google Analytics concepts; ROI and ROMI analysis.

Description

U4: Unit IV: Predictive Analytics and Business Intelligence

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

None

U4-T1. Regression and classification – Linear Regression, Ordinal Regression, Binary Regression and Panel Regression; Model evaluation, Forecasting demand; Recommendation systems, Data Visualization and Insights.

U5: Unit V: Customer Insights with AI

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Qualitative Approach: Conducting interviews and observation - AI-assisted analysis - Insights generation; Quantitative Approach: Surveys – Causality; A/B testing, Experimental design, Using Generative AI applications for Marketing Research, Ethical usage of AI.

EXAMINATION PATTERN

COURSE NAME: MARKETING ANALYTICS AND INTELLIGENCE

COURSE CODE: COH404M-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - 1: 35 marks (Classroom-based) CIA - 2: 35 marks (Classroom-based) CIA - 3: 30 marks (Computer Lab-based)

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Analyse organisational behaviour concepts, models, and interdisciplinary foundations to examine contemporary challenges such as diversity, sustainability, and green organisational behaviour.

CO2: Evaluate the influence of personality, values, attitudes, emotions, on individual behaviour, ethical conduct, employee well-being and sustainability outcomes in AI-driven work environments.

CO3: Analyse learning, perception, motivation and decision-making processes to assess behavioural change, ethical judgement, sustainability-oriented decisions, and the impact of artificial intelligence on managerial decision-making..

CO4: Analyse group dynamics, team processes, and collaborative mechanisms, including green teams and technology-enabled teams, to evaluate their effectiveness in achieving organisational and sustainability goals.

CO5: Evaluate the role of power, conflict, negotiation, resilience, leadership, organisational culture, and change in managing sustainability initiatives.

Sustainability Development Goals (SDG)

Decent work and economic growth, Gender equality, Good health and well-being, Industry, innovation and infrastructure, Partnerships for the goals, Peace, justice and strong institutions, Reduced inequalities

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Empathy and active listening, Leadership and social influence, Motivation and self-awareness, Quality control, Resilience flexibility and agility

Course Content

U1: Introduction to Organisational Behaviour

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. Introduction to Organisational Behaviour

Description

Meaning of Organisational Behaviour, Nature of Organisational Behaviour, Disciplines contributing to Organisational Behaviour, Challenges and opportunities for OB, Diversity in organisations, Biographical characteristics, Diversity management, Organisational Behaviour models, Green Organisational Behaviour (GOB), Sustainability and workplace behaviour, Environmental psychology in the workplace, Pro-environmental behaviour and psychological safety at work.

U2: Individual Behaviour

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Environment, Professional Ethics

U2-T1. Individual Behaviour

Description

Individual Behaviour - Factors Influencing Individual Behaviour, Personality – meaning, Type A and Type B personality, MBTI, Big Five Personality Model, Locus of Control, Core Self-Evaluation, Machiavellianism, Narcissism, Values and attitudes – importance of values, Terminal and Instrumental values, Whistle-blowing as an ethical issue in organisational behaviour, Values across cultures – Hofstede and GLOBE frameworks, Components of attitudes, Job-related attitudes, Job involvement, Job satisfaction – causes and effects Emotions and moods – emotional labour, Emotional intelligence, OB applications of emotions and moods, Stress management – work-related stress, Stress and burnout, Management of stress, Technostress and AI-driven work stress Motivation, theories of motivation - Need Hierarchy Theory, Theory X and Theory Y, Herzberg's Two-Factor Theory, McClelland's Theory of Needs.

U3: Learning, Perception and Individual Decision-Making

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Gender, Human Values, Professional Ethics

U3-T1. Learning, Perception and Individual Decision-Making

Description

Learning – definition and importance, Theories of learning - Stimulus-Response Theory, Cognitive Theory, Social Learning Theory, Principles of learning, Shaping as a managerial tool, Learning for green behaviour Perception – factors influencing perception, Attribution theory, Common shortcuts in judging people, Link between perception and individual decision-making. Decision-making in organisations, Ethics in decision-making, Artificial intelligence in managerial decision-making, and Data-driven decision-making.

U4: Foundations in Group Behaviour and Team

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics

U4-T1. Group Behaviour and Team Dynamics

Description

Defining and classifying groups, Tuckman's model of group development, Factors influencing group behaviour, Group properties – roles, norms, status, size, cohesiveness, Group decision- making – groupthink, group shift, Techniques in group decision-making, Transactional Analysis, Johari Window, Types of teams - green teams, virtual teams, cross-functional sustainability teams. Creating effective teams - Teams and collaborations - Technology-enabled collaboration.

U5: Power, Conflict and Negotiation – Dynamics of Organisational Behaviour

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Environment, Human Values, Professional Ethics, Sustainability

U5-T1. Dynamics of Organisational Behaviour - Power, Conflict and Negotiation

Description

Leadership - shared leadership, transformational leadership, authentic leadership, Ethical and responsible leadership, Leadership for sustainability Power – meaning and sources, Power and politics in organisations, Conflict – process, sources and outcomes, Conflict management, Negotiation process, Negotiation strategies, Global implications of negotiation Organisational culture – definition and functions, Creating and sustaining culture, Organisational culture and climate, Creating a culture for sustainability and innovation, Green organisational culture, Spirituality and organisational culture. Organisational change – meaning, forces for change, Resistance to change – overcoming resistance to change, Approaches to managing organisational change, Behavioural change for sustainability.

Essential Reading

1. Robbins, S. P., & Judge, T. A. (2022). Organizational Behavior (19th ed.). Pearson Education.
1. Luthans, F., Doh, J. P., & Luthans, B. C. (2021). Organizational Behavior: An Evidence-Based Approach (14th ed.). Information Age Publishing.
1. McShane, S. L., & Von Glinow, M. A. (2021). Organizational Behavior: Emerging Knowledge, Global Reality (9th ed.). McGraw-Hill Education.

EXAMINATION PATTERN

COURSE NAME: ORGANISATIONAL BEHAVIOUR

COURSE CODE: COM402-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Assessment Component | Description | Marks | CIA I | Quizzes- role plays- objective type tests- written assignments- discussion forums- article reviews- case analysis etc. | 20 | CIA II | Mid-semester written examination conducted for 2 hours duration Sections Type Marks A Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) 3 X 5 = 15 B Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) 2 x 10 = 20 C Case Study (Compulsory) 1 x 15 = 15 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | 50 | Sections | Type | Marks | A | Short Answer Questions (Answer ALL three questions out of which third question will be an internal choice. Each question carries five marks) | 3 X 5 = 15 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL two questions out of which one will be an internal choice. Each question carries ten marks) | 2 x 10 = 20 | C | Case Study (Compulsory) | 1 x 15 = 15 | CIA III | Group work consisting of presentations- Viva voce- and report submission. | 20 |

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Written examination conducted for 3 hours duration:

Sections | Type | Marks | A | Short Answer Questions (Answer ALL seven questions out of which six and seven have internal choice). Each question carries five marks | 7 X 5 = 35 | B | Conceptual / Descriptive/Problem Type questions (Answer ALL five questions out of which two questions are internal choice). Each question carries ten marks) | 5 x 10 = 50 | C | Case Study (Compulsory) | 1 x 15 = 15 |

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

COURSE TYPE: Practical

TOTAL HRS: 8 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VII)

Course learning Outcomes

CO1: Identify and define a domain related research problem that requires data-driven analysis.

CO2: Apply financial, statistical, and computational tools to analyze real-world data.

CO3: Analyze relationships and patterns within financial datasets using appropriate models.

CO4: Evaluate the robustness and reliability of analytical outcomes.

CO5: Design and present a data-driven solution or model that addresses a financial problem

Sustainability Development Goals (SDG)

Industry, innovation and infrastructure, Quality education

21st Century Skills

Analytical thinking

Course Content

U1: Project Submission Phases

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U1-T1. Phases of Project: Phase 1: Orientation and Proposal Development Weeks 1–2 - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process Project proposal (Title, objectives, rationale, data source, methodology) Phase 2: Literature Review and Conceptual Framework Weeks 3–4 - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building conceptual and analytical framework Literature review report and research design Phase 3: Data Collection and Preparation Weeks 5–6 - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis. Cleaned dataset and exploratory data analysis report Phase 4: Model Building and Analysis Weeks 7–11 - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing

Description

Phase | Weeks | Focus Area | Expected Deliverables | Phase 1: Orientation and Proposal Development | Weeks 1–2 | - Introduction to project-based learning and applied research in finance- Topic selection and scope definition- Proposal writing and approval process | Project proposal (Title, objectives, rationale, data source, methodology) | Phase 2: Literature Review and Conceptual Framework | Weeks 3–4 | - Review of relevant academic and industry literature- Identification of variables and hypotheses- Building a conceptual and analytical framework | Literature review report and research design | Phase 3: Data Collection and Preparation | Weeks 5–6 | - Data sourcing (Bloomberg, NSE, RBI, Yahoo Finance, Kaggle, etc.)- Data cleaning, preprocessing, and descriptive analysis | Cleaned dataset and exploratory data analysis report | Phase 4: Model Building and Analysis | Weeks 7–11 | - Model development using econometrics, machine learning, or financial modeling tools- Application of Python, R, or Excel for analysis- Validation and performance testing | Analytical model with output, interpretation, and visualizations | Phase 5: Report Writing and Presentation | Weeks 12–15 | - Structuring report (Abstract, Methodology, Results, Conclusion)- Final presentation and viva preparation | Final report, project presentation, and viva voce | Phase 6: Evaluation and Reflection | Week 16 | - Final evaluation by panel- Reflection on learning outcomes | Evaluation report and reflective summary |

U2: Suggested Project Themes

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

None

U2-T1. ♦ Financial Markets & Investment Analytics • Predicting stock price movements using machine learning • Sentiment analysis of financial news and its impact on stock returns • Portfolio optimization using risk-return analytics • Volatility modeling using GARCH or ARIMA models ♦ Corporate Finance & Valuation • Startup valuation using financial ratios and cash flow models • Financial distress prediction using logistic regression or random forest • Cost of capital and capital structure optimization ♦ Banking & Risk Analytics • Credit risk modeling using historical default data • Loan default prediction using classification algorithms • Value-at-Risk (VaR) and Expected Shortfall computation for portfolios ♦ Macroeconomics & Policy Analysis • Exchange rate forecasting using time series models • Impact of macroeconomic indicators on stock market performance • Inflation forecasting using ARIMA or regression techniques

Description

Financial Reporting & ESG Analytics • ESG disclosure sentiment analysis using NLP

- Financial statement fraud detection using anomaly detection
- Earnings call transcript analysis and its impact on firm performance

EXAMINATION PATTERN

COURSE NAME: CAPSTONE PROJECT

COURSE CODE: COM481-7

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

Evaluation and Assessment Structure (100 Marks)

Component | Weightage | Evaluation Criteria | Project Proposal | 10% | Clarity of problem statement, feasibility, and research plan | Literature Review | 10% | Depth of review, conceptual framework | Data Preparation & Analysis | 20% | Data quality, methodology, and statistical rigor | Model Building & Findings | 25% | Accuracy, interpretation, and innovation | Final Report | 20% | Structure, clarity, referencing, and conclusions | Presentation & Viva | 15% | Communication, defense, and analytical insights |

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

COURSE TYPE: Practical

TOTAL HRS: 30 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Apply theoretical knowledge to real-world business environments

CO2: Demonstrate professional skills and workplace competencies

CO3: Critically analyse business operations and organizational practices

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals 21st Century Skills

Analytical thinking, Curiosity and lifelong learning, Empathy and active listening, Leadership and social influence, Quality control, Resilience flexibility and agility, Technological literacy

Course Content

U1: Introduction to the Organization

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U1-T1. 1.1 Profile of the organization (including evolution, awards and recognition) 1.2

Vision, Mission, Goals

U2: Organizational Design and Functional Areas

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics

U2-T1. 2.1 Organization design & structure 2.2 Departments and Divisions 2.3 Product/s and Service/s 2.4 Business Model

Description

- Hierarchical/flat/matrix structure (include organogram if possible) • Overview of key functional

departments • Major offerings, features, target market • Revenue generation, customer acquisition, delivery mechanism

U3: Key Performance Areas (KPA's), Organizational Control and Strategies

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. 3.1 KPA's of the various departments 3.2 Accounting Standards & Reporting followed 3.3 HR Practices 3.4 Financial Highlights 3.5 Modes of Marketing 3.6 Integration of AI 3.7 Tax Filing & Auditing 3.8 SWOC Analysis of the Organization (Based on the intern's observation and analysis supported by facts)

Description

KPAs across various departments (Sales, HR, Finance, etc.) • IND AS, internal reporting systems, compliance frameworks • Recruitment, appraisal, training, and retention strategies • Key financials (Turnover, Profit, Investments – if available) • Digital, traditional, B2B/B2C approaches, branding • Use of AI, automation tools, ERP systems, CRM tools • Tax practices, statutory audit process, internal audits • Strengths, Weaknesses, Opportunities, Challenges • Factors driving organisational growth and sustainability • Intern's strategic operational recommendations

U4: Course Learning Outcomes and Conclusion

Teaching Hours: (60)

Development Needs:

Global, National, Regional

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Human Values, Professional Ethics, Sustainability

U4-T1. 4.1 Applications of Theoretical Knowledge to Real-World Business Environments 4.1.1 Relevance of Academic Theories (Accounting, Finance, HR, etc.) 4.1.2 Gaps or Irrelevance Identified 4.2 Professional Skills and Workplace Competencies 4.2.1 New Skills Acquired During Internship 4.2.2 Existing Skills Nurtured or Strengthened 4.2.3 Skills/Competencies Identified for Further Development 4.2.4 Input from Key Personnel

Description

4.3 Critical Analysis of Business Operations and Practices

4.3.1 Good Business Practices Observed

4.3.2 Practices Worth Replicating at CHRIST University

Conclusion

Summary of internship experience

Key takeaways and reflections

Impact of internship on career readiness

EXAMINATION PATTERN

COURSE NAME: INTERNSHIP

COURSE CODE: COM481-8

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Assessment (Marks Distribution) Weekly Report Submission - 40 Marks Industry Mentor's Evaluation - 20 Marks Internship Mentor's Evaluation - 40 Marks Internship Report Evaluation - 50 Marks Viva Voce Examination - 50 Marks Total - 200 Marks

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, necessity, and defining characteristics of quantitative research, and distinguish it from qualitative research

CO2: Design a basic survey framework by identifying suitable sampling methods, data collection modes, and approaches to minimize non-response bias.

CO3: Develop valid and reliable survey instruments through appropriate question design, scaling, and pretesting techniques.

CO4: Evaluate experimental designs and identify strategies to ensure validity, control variables, and derive causal inferences in business research.

CO5: Perform and interpret statistical analyses ethically, integrating quantitative findings into evidence-based business decision-making.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Motivation and self-awareness, Technological literacy

Course Content

U1: Foundations of Quantitative Research

Teaching Hours: (6)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Quantitative Research -. Nature, Necessity, and Importance - Relevance and Urgency in the Data-Driven Era (ADHOGS & DVUCA) - Defining Characteristics: Scope, Objectivity, Goal, Data, and Method - Quantitative vs. Qualitative Research - Strengths and Shortcomings

U2: Introduction to Survey Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Survey Research – Meaning and Purpose – When and Why Surveys Are Used – Types of Surveys (Cross-Sectional, Longitudinal) – Sampling in Survey Research (Sampling Frame, Probability & Non-probability Methods) – Non-response and Bias Reduction – Modes of Survey Data Collection (Mail, Telephone, Online, Face-to-Face) – Implementation and Ethical Considerations

U3: Advanced Considerations in Survey Research

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Designing Good Measures – Question Design and Wording – Scales and Response Formats – Reliability and Validity of Instruments – Pre-testing and Pilot Studies – Survey Implementation and Interviewer Training – Data Preparation (Coding, Cleaning, Data Entry) – Ethical and Error Perspectives (Total Survey Error, Bias Control)

U4: Experimental Research

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Experimental Research – Concept and Purpose – Independent and Dependent Variables – Randomization and Control – True, Quasi-, and Field Experiments – Internal and External Validity – Threats to Validity and Control Techniques – Practical Applications in Commerce and Management Contexts – Ethical Issues in Experimental Studies

U5: Data Analysis in Quantitative Research

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Employability

Cross Cutting Issues:

Professional Ethics

U5-T1. Data Preparation – Handling Missing Data and Outliers – Testing Assumptions (Normality, Linearity, Multicollinearity) – Descriptive and Inferential Statistics (Mean, SD, t-test, ANOVA, Correlation, Regression) – Multivariate Analysis (Factor Analysis, CB-SEM, PLS-SEM) – Hypothesis Testing and Error Types (I–IV) – Effect Size and Statistical Power – Interpreting and Reporting Results – Ensuring Reproducibility and Ethical Reporting
Essential Reading

1. Fowler, F. J. (2025). Survey research methods (Reprint 5th ed.). SAGE Publications.
1. Campbell, D. T., & Stanley, J. C. (2025). Experimental and quasi-experimental designs for research. Ravenio Books.
1. Field, A. (2025). Discovering statistics using IBM SPSS statistics (5th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUANTITATIVE RESEARCH METHODS

COURSE CODE: COM501R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA -III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35

Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

COURSE TYPE: Theory

TOTAL HRS: 4 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Explain the philosophical foundations, design process, and ethical considerations of qualitative research.

CO2: Distinguish among the five qualitative research approaches and identify suitable designs for business contexts.

CO3: Develop qualitative research problems, purpose statements, and research questions aligned with study objectives.

CO4: Apply appropriate methods for qualitative data collection, coding, and thematic analysis using software tools.

CO5: Write and evaluate qualitative research reports incorporating reflexivity, validation, and ethical standards.

Sustainability Development Goals (SDG)

Decent work and economic growth, Industry, innovation and infrastructure, Partnerships for the goals

21st Century Skills

Analytical thinking, Creative thinking, Curiosity and lifelong learning, Dependability and attention to detail, Technological literacy

Course Content

U1: Designing a Qualitative Study

Teaching Hours: (12)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Qualitative Research – Meaning - Characteristics and purpose of qualitative research - When to use qualitative research - Ethical considerations and preliminary design issues - Steps in the qualitative research process - Components of a qualitative research proposal.

U2: Five Qualitative Approaches to Inquiry

Teaching Hours: (14)

Development Needs:

Global

Skill Focused:

Skill Development
Cross Cutting Issues:
Professional Ethics

U2-T1. Overview of five approaches – Narrative, Phenomenological, Grounded Theory, Ethnographic, and Case Study – Definition, features, and procedures of each approach – Application in business and management research – Challenges in each approach – Comparison of approaches.

U3: Introducing and Focusing the Study

Teaching Hours: (10)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Formulating the research problem – Developing purpose and research questions – The central question and sub-questions – Aligning research questions with the chosen qualitative approach – Writing qualitative purpose statements and research questions.

U4: Data Collection, Analysis and Representation

Teaching Hours: (16)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U4-T1. Data Collection: Meaning and process of data collection in qualitative studies – The data collection circle – Selection of sites and participants – Purposeful sampling strategy – Forms of data: interviews, observations, documents, audiovisual materials – Field issues and ethical considerations.

U4-T2. Data Analysis and Representation: Organising, coding, and categorising qualitative data – Data analysis spiral – Thematic analysis – Representing and visualising data – Introduction to qualitative software (NVivo, Atlas.ti, MAXQDA).

U5: Writing, Validation and Evaluation in Qualitative Research

Teaching Hours: (8)

Development Needs:

Global

Skill Focused:

Skill Development

Cross Cutting Issues:

Professional Ethics

U5-T1. Writing qualitative research reports – Structure and style – Reflexivity and representation – Validation and reliability in qualitative research – Strategies for trustworthiness – Evaluation standards for qualitative studies.

Essential Reading

Creswell, J. W., & Poth, C. N. (2025). Qualitative Inquiry and Research Design: Choosing Among Five Approaches (4th ed.). SAGE Publications.

EXAMINATION PATTERN

COURSE NAME: QUALITATIVE RESEARCH METHODS

COURSE CODE: COM502R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA - I - 20 CIA - II - 50 CIA - III - 20

QUESTION PAPER PATTERN FOR END SEMESTER EXAMINATION (ESE)

Section A - 7 x 5 = 35 Section B - 5 x 10 = 50 Section C - 1 x 15 = 15

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

COURSE TYPE: Practical

TOTAL HRS: 360 Hours/Week

OFFERED PROGRAMMES:

- Bachelor of Commerce (Accountancy and Taxation Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Applied Finance and Analytics Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Finance and Investment Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Honours/Honours with Research) (SEMESTER - VIII)
- Bachelor of Commerce (Strategic Finance Honours/Honours with Research) (SEMESTER - VIII)

Course learning Outcomes

CO1: Demonstrate the ability to plan and execute a research project within defined time constraints and available resources.

CO2: Perform a substantial review of literature relevant to the chosen research topic to justify the significance of the study.

CO3: Demonstrate mastery of quantitative or qualitative research skills applicable to commerce and management contexts.

CO4: Demonstrate a clear knowledge and understanding of ethical standards in data collection, reporting, and academic integrity

CO5: Demonstrate effective communication of complex business concepts through both a written document and an oral presentation

Sustainability Development Goals (SDG)

Decent work and economic growth, Quality education

21st Century Skills

Analytical thinking, Creative thinking, Dependability and attention to detail, Technological literacy

Course Content

U1: Dissertation Proposal

Teaching Hours: (60)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U1-T1. Before beginning the full dissertation, candidates must submit a proposal that proves the research is novel, significant, and feasible.

Description

Content and Structure• Specific Aims: Concisely state research goals, hypotheses (if applicable), and the expected impact on management practices or commerce theory.

Research Strategy:• Significance: Explain the critical barrier in commerce/management the project addresses and how it improves existing professional knowledge.

- Innovation: Describe any novel theoretical frameworks, methodologies, or applications that challenge current business paradigms.
- Approach: Detail the methodology (e.g., quantitative, qualitative, or mixed methods) and data analysis plans.
- Timeline and Milestones (1 page): A outline of benchmarks, from data collection to the final defense.
- Preliminary Studies: Discuss any initial data or pilot studies conducted to establish the feasibility of the project.

U2: Dissertation Structure

Teaching Hours: (295)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U2-T1. Dissertation is divided into three parts - Preliminary Pages, Main Body and End Matter

Description

PRELIMINARY PAGES

1. Title Page - Title of the Dissertation, Student Name & Register Number, Programme: BCom (Honours) with Research, Department / Institution Name, Supervisor Name & Designation, Academic Year 2. Declaration by the Student - Certificate from the Supervisor, Acknowledgements (Optional but recommended) 3. Abstract - 200–300 words, Background, Objectives, Methodology, Key findings, Keywords (4–6) 4. Table of Contents 5. List of Tables 6. List of Figures (if applicable) 7. List of Abbreviations (if applicable)

B. MAIN BODY OF THE DISSERTATION

Chapter I – Introduction - Background of the Study, Conceptual / Theoretical Context, Statement of the Problem, Need and Significance of the Study, Objectives of the Study, Research Questions , Scope of the Study, Limitations of the Study, Chapterisation Scheme

Chapter II – Review of Literature and Hypotheses Development - Introduction, Review of International Studies, Review of National Studies, Research Gap Identification, Conceptual Framework / Research Model (if applicable), Hypothesis Development Chapter - 3 Research Methodology

Chapter - 4 Data Analysis and Interpretation

Chapter V – Findings, Suggestions and Conclusion

END MATTER

References and Appendices

U3: Other Guidelines

Teaching Hours: (5)

Development Needs:

Global

Skill Focused:

Employability, Skill Development

Cross Cutting Issues:

Professional Ethics

U3-T1. Font Style: Times New Roman Font Size (Preliminary Pages): 14 point (e.g., Title Page, Abstract, Table of Contents). Font Size (Main Body): 12 point. Line Spacing: 1.5 spacing throughout (No double spacing). Margins: One inch on all sides. APA 7th edition guidelines to be followed. Final Viva Voce Examination. Students are encouraged to present their work in the conferences. They are also encouraged to convert their research into Scopus, WoS, or ABDC publications.

EXAMINATION PATTERN

COURSE NAME: RESEARCH DISSERTATION

COURSE CODE: COM581R-8

PATTERN FOR CONTINUOUS INTERNAL ASSESSMENT (CIA)

CIA Overall = 300
